RE: Application for non-standard oil well location: Bilberry Well No. 3, SW/4 Section 11, Township 8 South, Range 37 East, Bluit-San Andres Associated Pool, Roosevelt County.

Dear Mr. O'Brien:

We may not process the subject application for non-standard location until the required information or plats checked below (is)(are) submitted.

- ☐ A plat must be submitted clearly showing the ownership of all offsetting leases.
- ☐ A statement must be submitted that all offset operators have been notified of the application by certified mail.
- ☐ A plat must be submitted fully identifying the topography necessitating the non-standard location.
- ☒ OTHER: Which well location is correct and what two quarter-quarter sections does the proposed 80-acre proration unit comprise.

Sincerely,

Michael E. Stogner
Chief Hearing Officer/Engineer

Re: OGS Operating Company, Inc.
Proposed Bilberry #3 Well
990' FSL & 1650' FWL
Section 11, T-8-S, R-37-E
Roosevelt County, New Mexico
(NM015 Bluitt)

Gentlemen:

OGS Operating Company, Inc. intends to drill the referenced well to an approximate depth of 4650 feet or sufficient to test a middle San Andres oil zone. This well is subject to the special rules and regulations of the Bluitt-San Andres Associated Pool which set forth well location and proration unit acreage requirements as follows:

" RULE 2. (a) A standard oil proration unit shall be 80 acres. A standard gas proration unit shall be 320 acres.

RULE 2. (b) Oil wells shall be located within 150 feet of the center of quarter-quarter section.

Gas wells shall be located not closer than 990 feet to the quarter section line nor closer than 330 feet to any quarter-quarter section line. "

If the middle San Andres oil zone is not commercially productive, OGS intends to plug back to a shallower San Andres zone which is typically a marginal gas reservoir.

The proposed Bilberry #3 well is to be located 990' FSL & 1650' FWL of Section 11, T-8-S, R-37-E, Roosevelt County, New Mexico which is an orthodox location for a gas well under RULE 2. (b) of the Special Rules and Regulations of the Bluitt-San Andres Associated Pool. If the well is completed as an oil well it will require an exception to RULE 2. (b).

OIL CONVERSATION DIVISION

April 30, 1992

Page 2

OGS owns oil and gas leases covering the SW/4 of Section 11, being 160 acres, more or less. Should the proposed well be completed as an oil well, OGS has enough acreage for two standard oil proration units. However, if the well is completed as a gas well, OGS intends to form a non-standard unit composed of the SW/4 of Section 11, which is 50% of a standard gas proration unit.

This letter is intended as an application for approval of a possible unorthodox oil location for the proposed well and a request for an exception to RULE 2. (a) of the Special Rules and Regulations for the Bluit-San Andres Associated Pool for the possible formation of a non-standard gas proration unit.

Enclosed is a plat showing the proposed non-standard proration unit, the ownership and operators of all leases offsetting the proration unit and the proposed location of the OGS Operating Company, Inc. Bilberry #3 well. There are no wells currently located on the SW/4 of Section 11.

A copy of this letter has been sent Certified Mail Return Receipt Requested to all of the offset operators and all operators owning an interest acreage in Section 11 which is not included in the proposed non-standard unit (see attached list).

Yours truly,

Thom O'Brien
