Re: Application for Non-Standard Location
P-R-O Management, Inc.
Bolack "J" #1
1450' FSL 1450' FEL Sec. 28-T27N-R11W
Basin Fruitland Coal Gas Pool
San Juan County, New Mexico

Gentlemen:

We, on behalf of P-R-O Management, Inc., hereby make application for approval of the location of their Bolack "J" #1 well to be located 1450' FSL 1450' FEL of Section 28 Township 27 North, Range 11 West, Basin Fruitland Coal Gas Pool, San Juan County, New Mexico.

The reason for the off-pattern location is to utilize an existing wellbore plugged back from a deeper formation.

There is an uneconomical well in the northeast quarter, but it was slim-hole completed with 2-7/8" casing with perforations in the Fruitland Sand above the Fruitland Coal; therefore, fracture stimulation would not be feasible.

We believe that directional drilling should not be required because the well has been drilled and has casing cemented in it.

The distances between wells is within the footage parameters required by Order R-8759.

It is our belief that the information contained in this application is true and correct according to the information available to us.

All offset operators and/or lease owners are being notified by certified mail at this mailing. The Return Receipt Cards will be provided when they are returned.

If further information is needed, please contact us.

Yours very truly,

A. R. Kendrick

Enclosures
