Gentlemen:

Union Oil Company of California (UNOCAL) requests permission for a nonstandard Basin Dakota/Blanco Mesa Verde location for our existing Rincon Unit No. 302 well, located 150' FNL and 2455' FWL, Section 11, T26N-R7W, Rio Arriba County, New Mexico.

This well was originally permitted (and approval granted from the State and BLM) as a Basin Dakota/Largo Gallup well. The well was spudded July 6, 1994 and TD'ed at 7,612', July 18, 1994. The well was logged and 5-1/2" production casing was run and cemented. After evaluating the logs we find that the Gallup formation has no production potential and any perforating/stimulation in the Gallup is not warranted. Therefore, UNOCAL wishes to complete the well in the Dakota/Mesa Verde formation.

The offset lease owner, Louis Dreyfus Natural Gas Corporation has been contacted by certified letter requesting Waiver of Objection to this proposed unorthodox location.

If you have any questions, please contact me at 307/234-1563 ext 116. Thank you for your help in this matter.

Sincerely,

Jim Benson  
Drilling Superintendent

Michael, I just read my reference to you in Highlights; was it offensive? I intended it to be complimentary as well as the truth! If I missed the mark, I need to know so I won't goof again.

On Thursday and Friday of this week, at the Llano street library community room, I will be "facilitating" a complete INTERACTION class for the folks in ECMD; I thought you might like to see it in action as you consider becoming a trainer. It's not nearly as hard as MBR; everything is very programmed but it allows alot of latitude for one's personal touch. Let me know if your schedule will permit. You'll LOVE these folks; their entire division took MBR last December, with Myers Briggs so now we are concluding with INTERACTION, just as I dream of doing with OCD.

I also need your ideas on a "fun event" for the Pacheco folks to host to welcome you all over here; I'll be at the staff meeting tomorrow so if you can't respond before then, we can discuss.
