NATURE OF RELEASE

Type of Release Drilling fluids	Volume of Release 150-200 bbls	Volume Recovered 125 bbls
Source of Release. Steel pit closed loop system	Date and Hour of Occurrence 5/2/2008 3:00 am	Date and Hour of Discovery same
Was Immediate Notice Given? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required <input type="checkbox"/>	If YES, To Whom? Larry Johnson voice mailbox follow up by E-mail.	
By Whom? Mike Stubblefield	Date and Hour 5/2/2008 2:30pm	RECEIVED
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*
MAY 07 2008
HOBBS OCD

Describe Cause of Problem and Remedial Action Taken.* During drilling operations a hose busted on the steel pit closed loop system. The hose was repaired. A backhoe was called to the location, the impacted area was the area around the steel pits & the edge of the drilling reserve pit. The backhoe recovered 90% of the released mud which was placed back into the drilling reserve pit. The drilling crew recovered mud using shovels.

Describe Area Affected and Cleanup Action Taken.
The impacted area was the area around the steel pit closed loop system & the edge of the drilling reserve pit. When the drilling equipment is moved off the location. The remaining drilling mud will be excavated and then placed into the drilling pit. Soil samples will be taken from the impacted area. Soil samples taken will be submitted to a second party lab and analysis ran for TPH, B-TEX, and Chlorides. A Remediation work plan based on analytical results will be submitted to NMOCD for the remediation of release. The nearest water information is from a monitor well drilled on 5/21/07 by TalonLPE at the Ut.P 14-10s-34e Merle State Unit #3.

The monitor well was TD at 70'. Monitor well found to be dry.
Site ranking Depth to ground water - 50'-99', Wellhead protection area - > 1000', Distance to surface water body - > 1000' site ranking score - 10

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations
