Re: NPDES Application No. NM0030074-Navajo Refining Company

Dear Mr. Moore:

In accordance with your request of September 7, 2000, you are hereby notified that your National Pollutant Discharge Elimination System (NPDES) application for the above referenced facility has been discontinued and void.

Any resumption of the discharge or any new discharge from your facility without a permit will be unlawful. Should you again propose to discharge any pollutants from this facility to waters of the United States, it will be necessary to file a new NPDES application at least 180 days in advance of the proposed discharge.

If you have any questions, please do not hesitate to contact La Gayla Bradley at the above address or telephone (214) 665-7517.

Sincerely yours,

Jayne Fontenot

Storm Water Notice Of Termination
401 M Street, S.W.
Washington, DC 20460

To whom it may concern:

Enclosed is a form 3510-7 detailing Navajo Refining Company's intention to terminate our storm water permit. This plant has constructed retention basins and drainage to the point where we haven't had a stormwater discharge in several years. We will continue the best management practices as a matter of good housekeeping.

If there are any questions, please call me at 505-746-5281. Thank you for your attention to this matter.

Instructions for Completing Notice of Termination (NOT) Form

Who May File a Notice of Termination (NOT) Form

Permittees who are presently covered under an EPA-issued National Pollutant Discharge Elimination System (NPDES) General Permit (including the 1995 Multi-Sector Permit) for Storm Water Discharges Associated with Industrial Activity may submit a Notice of Termination (NOT) form when their facilities no longer have any storm water discharges associated with industrial activity as defined in the storm water regulations at 40 CFR 122.26(b)(14), or when they are no longer the operator of the facilities.

For construction activities, elimination of all storm water discharges associated with industrial activity occurs when disturbed soils at the construction site have been finally stabilized and temporary erosion and sediment control measures have been removed or will be removed at an appropriate time, or that all storm water discharges associated with industrial activity from the construction site that are authorized by a NPDES general permit have otherwise been eliminated. Final stabilization means that all soil-disturbing activities at the site have been completed, and that a uniform perennial vegetative cover with a density of 70% of the cover for unpaved areas and areas not covered by permanent structures has been established, or equivalent permanent stabilization measures (such as the use of riprap, gabions, or geotextiles) have been employed.
