RE: Request for Administrative Approval  
Proposed Red Ruby '35' Federal Well No. 1  
Sec. 35, T23S, R32E  
Lea County, New Mexico

Mr. Stogner:

Burlington Resources Oil & Gas Company respectfully requests administrative approval for an unorthodox location for the above referenced proposed well. The original location was to be 660' FNL & 660' FEL. Upon physically staking the well, and as indicated on the enclosed plat, the proposed location would not work due to existing powerlines that run to an east/west direction, a pipeline that runs in a northeast/southwest direction, and a privately owned water line. Also, upon staking of this well, it was discovered that there was an existing disposal well approximately 50' from the intended location. Due to safety reasons and avoidance of problems, it was determined that the new well needed to be at least 200' away from this well. The proposed well will be a Bone Spring/Delaware development which is on a 40 acre proration unit. With all the adjustments that were made, the new location of 1101' FNL & 829' FEL encroaching on the 40 acre unit directly south of the location. Burlington's lease covers the east half of the section, so the said encroachment only affects Burlington's interests.

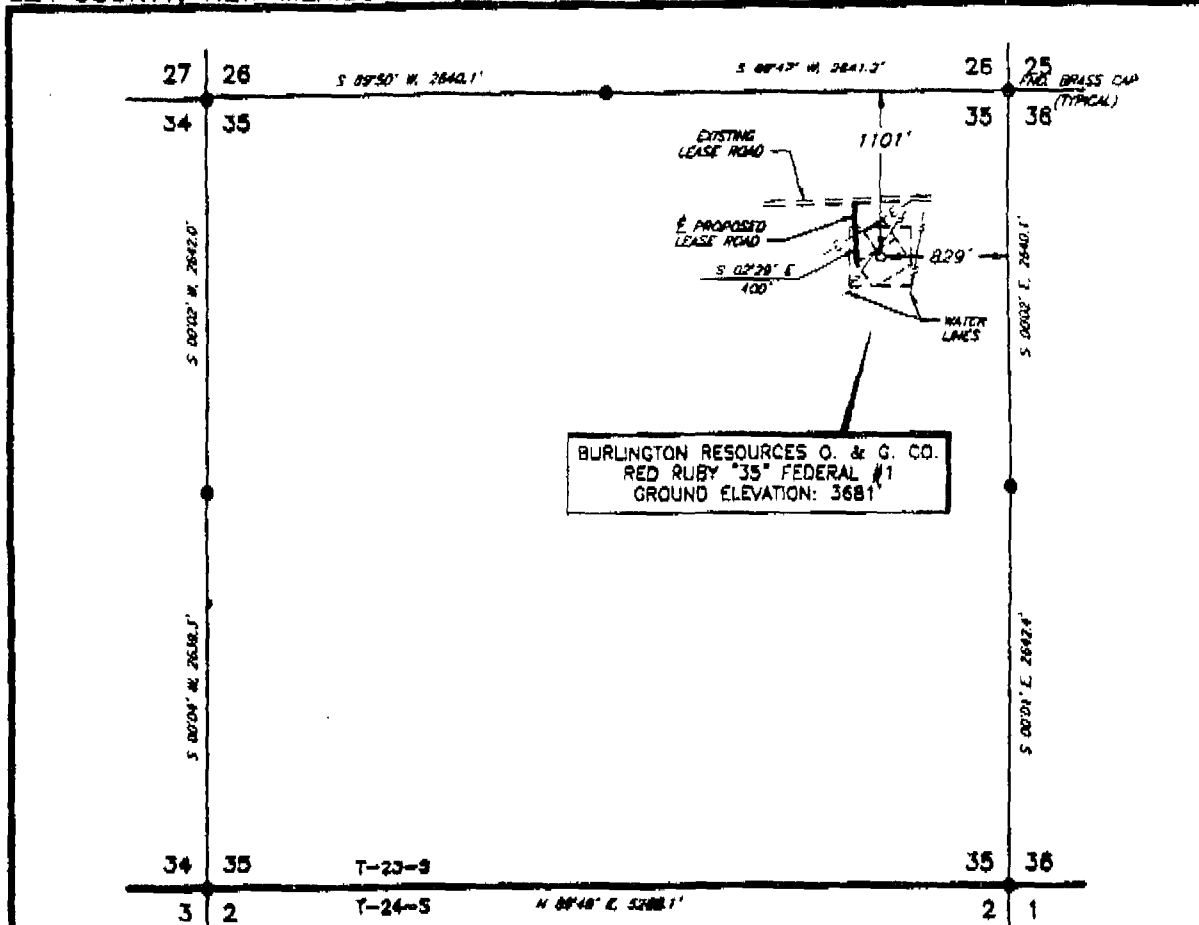

Should you have any questions, or need additional information, please do not hesitate to contact me at 915-688-6943.

Sincerely,

Donna Williams  
Regulatory Compliance
