Describe Cause of Problem and Remedial Action Taken.\*

A dresser sleeve on a buried line eroded, burst and fluid escaped to surface and mixed with pooled rain water. Area affected ~ approximately 500' X 500'. Estimated volume at 10 Bbls oil + 275 Bbls produced water. Vacuumed 350 Bbls fluid - additional fluid recovered was rain water pooled on surface.

Note on location of leak is in Section 17- the nearest active wells are our #61 & 51 in Section 16.

Describe Area Affected and Cleanup Action Taken.\*

Vacuuming oil 9/16/08. Still Accessing conditions and requesting the assistance of an environmental services expert.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
