ADMINISTRATIVE APPLICATION CHECKLIST

THIS CHECKLIST IS MANDATORY FOR ALL ADMINISTRATIVE APPLICATIONS FOR EXCEPTIONS TO DIVISION RULES AND REGULATIONS WHICH REQUIRE PROCESSING AT THE DIVISION LEVEL IN SANTA FE

Application Acronyms:

[NSL-Non-Standard Location] [NSP-Non-Standard Proration Unit] [SD-Simultaneous Dedication]
 [DHC-Downhole Commingling] [CTB-Lease Commingling] [PLC-Pool/Lease Commingling]
 [PC-Pool Commingling] [OLS - Off-Lease Storage] [OLM-Off-Lease Measurement]
 [WFX-Waterflood Expansion] [PMX-Pressure Maintenance Expansion]
 [SWD-Salt Water Disposal] [IPI-Injection Pressure Increase]
 [EOR-Qualified Enhanced Oil Recovery Certification] [PPR-Positive Production Response]

[1] TYPE OF APPLICATION - Check Those Which Apply for [A]

[A] Location - Spacing Unit - Simultaneous Dedication
☐ NSL ☐ NSP ☐ SD

Check One Only for [B] or [C]

[B] Commingling - Storage - Measurement
☐ DHC ☒ CTB ☒ PLC ☐ PC ☒ OLS ☐ OLM

[C] Injection - Disposal - Pressure Increase - Enhanced Oil Recovery
☐ WFX ☐ PMX ☐ SWD ☐ IPI ☐ EOR ☐ PPR

[D] Other: Specify _____

[2] NOTIFICATION REQUIRED TO: - Check Those Which Apply, or ☐ Does Not Apply

[A] ☒ Working, Royalty or Overriding Royalty Interest Owners

[B] ☒ Offset Operators, Leaseholders or Surface Owner

[C] ☐ Application is One Which Requires Published Legal Notice

[D] ☐ Notification and/or Concurrent Approval by BLM or SLO
 U.S. Bureau of Land Management - Commissioner of Public Lands, State Land Office

[E] ☒ For all of the above, Proof of Notification or Publication is Attached, and/or,

[F] ☐ Waivers are Attached

[3] SUBMIT ACCURATE AND COMPLETE INFORMATION REQUIRED TO PROCESS THE TYPE OF APPLICATION INDICATED ABOVE.

[4] **CERTIFICATION:** I hereby certify that the information submitted with this application for administrative approval is **accurate** and **complete** to the best of my knowledge. I also understand that **no action** will be taken on this application until the required information and notifications are submitted to the Division.

Note: Statement must be completed by an individual with managerial and/or supervisory capacity.

Re: Request for Surface Commingling
Tule Gas Field
T-2-S, R-29-E, NMPM
Roosevelt County, New Mexico

RECEIVED
2008 OCT 20 PM 3 31

Ladies and Gentlemen:

Eagle Resources, LP as the operator of the Tule Gas Field respectfully requests OCD approval for surface commingling of oil and gas production from seven (7) producing wells and associated leases. These wells and leases are as follows:

Lease Name	API Number	Location	Lease(s) Type
Cook #1	30-041 20823	B-34-2-29 ⁸⁶⁴³ D H	Fee Tule; Penn Gas (86443)
Wendell Best #1	30-041-20808	J-27-2-29 (DHC 4029)	Fee Tule; Penn Gas
J.T. McGee #1	30-041-20813	B-27-2-29 DHC-2634	Fee " " "
Speight #1	30-041-20819	I-22-2-29	Fee Tule; Penn Gas
Perry #1	30-041-20828	M-23-2-29	Fee " " "
Morrison #1	30-041-20846	A-22-2-29	Fee & Federal " "
Stoltenberg #1	30-041-20809	F-26-2-29	Fee Tule; San Andres Gas (86444)

History: In the early 1950s, the Grady Best #1 was the first well drilled in what would later become the Tule Field, this well was plugged and abandoned. The first commercial production and subsequent developmental drilling of the Tule field occurred in 1986 by Marshall Pipe and Supply Company of Dallas, Texas. Ultimately eight (8) wells were drilled and completed. These wells established commercial production from the Montoya and various sands and carbonates in the Pennsylvanian formations except for the Stoltenberg #1 which appears to be capable of production from the San Andres formation. Currently six (6) wells produce from the Montoya and/or Pennsylvanian formation, one (1) well (Powell #1) serves as a SWD well and the Stoltenberg #1 is scheduled for workover thereby reestablishing production from the San Andres formation.

After drilling and completion, and once production had been established, individual tank batteries with separation equipment was constructed for each producing well. During the past twenty (20) years this equipment deteriorated and was unserviceable when Eagle Resources, LP was acquired by a new investment and management group in 2007.

Recent Activity: Based upon the request of the surface owner and in consultation with and the approval of OCD Hobbs office personnel, Eagle began various workover, surface equipment replacement, reclamation, and restoration activities. These activities include, but were not necessarily limited to, the following:

1. Each location was re-built and cliché hauled to re-surface each pad.
2. All roads were clichéd to allow all weather access to the wells.
3. All pumping units, tanks, and flow-lines were removed.
4. Each well was pulled and down-hole equipment changed out such as rods, pump, and tubing - when required.
5. Each well was equipped with new pumping units with crank and bull guards.
6. New flow-line was laid and pressure tested.
7. Drilling pit areas, which had not fully reclaimed naturally, were reclaimed in accordance with OCD guidelines.

Due to the relatively low production volumes from the individual wells it is not economically feasible to install new individual tank batteries on each lease at an average cost of approximately \$100,000.00 per battery. However, Eagle determined that a centralized battery with individual well test equipment would be practical. In addition, a centralized facility has the added benefit of minimizing the visual impact versus multiple facilities and of minimizing the chance and mitigating the potential environmental impact of a surface storage failure.

The central battery was designed and built to allow Eagle the ability to monitor and test each well separately. This includes oil, gas, and water (a detailed diagram is shown on Exhibit "2"). This process improves the economics for all interest owners. This central battery was built on a cliché location and is fenced. All tank storage was set on 20 millimeter plastic liner and bermed. A main header system was constructed to allow each individual well to be isolated and tested through a separate production separation and storage system. Two 30" x 10' gas separators were placed in front of one 4' x 20" heater treater and one 6' x 20" heater treater. Gas from each gas separator is monitored and calculated through separate gas meter loops, then passes to another 30" x 10' gas separator in which a new compressor system moves the gas down the sales line. Produced water passes from each heater treater and metered to one 500 bbl fiberglass tank. The produced water is then transferred by pump to a disposal system. Oil passes from each heater treater to two (2) new 300 bbl steel tanks, each tank is gauged daily.

Conclusion: For the reasons cited herein, Eagle respectfully requests approval for surface commingling of the Tule Field wells and associated leases. In support of our request we enclose the following:

1. Well site diagrams.
2. Flow line routes and complete schematics of central battery construction with compressor site
3. Letter from OCD after final inspection of reclamation and restoration activities on Tule Field leases.
4. Letters and notification to working, royalty, and overriding royalty interest owners and off-set operators within ½ mile radius of the Tule Field leases.

Sincerely,

A handwritten signature in black ink, appearing to read "Frank Morgan", followed by a long horizontal flourish.

APPLICATION FOR SURFACE COMMINGLING (DIVERSE OWNERSHIP)

OPERATOR NAME: Eagle Resources, LP
OPERATOR ADDRESS: P.O. Box 3900, Roswell, NM 88202-3900
APPLICATION TYPE:

☐ Pool Commingling ☐ Lease Commingling ☒ Pool and Lease Commingling ☒ Off-Lease Storage and Measurement (Only if not Surface Commingled)

LEASE TYPE: ☒ Fee ☐ State ☒ Federal

Is this an Amendment to existing Order? ☐ Yes ☒ No If "Yes", please include the appropriate Order No. _____
Have the Bureau of Land Management (BLM) and State Land office (SLO) been notified in writing of the proposed commingling
☒ Yes ☐ No

(A) POOL COMMINGLING
Please attach sheets with the following information

(1) Pool Names and Codes	Gravities / BTU of Non-Commingled Production	Calculated Gravities / BTU of Commingled Production		Calculated Value of Commingled Production	Volumes
Pennsylvanian		1.096		\$19,000.00	3676
Montoya		1.096		\$11,100.00	2167
San Andres					0

- (2) Are any wells producing at top allowables? ☐ Yes ☒ No
(3) Has all interest owners been notified by certified mail of the proposed commingling? ☒ Yes ☐ No.
(4) Measurement type: ☒ Metering ☐ Other (Specify) Gauging
(5) Will commingling decrease the value of production? ☐ Yes ☒ No If "yes", describe why commingling should be approved

(B) LEASE COMMINGLING
Please attach sheets with the following information

- (1) Pool Name and Code.
(2) Is all production from same source of supply? ☒ Yes ☐ No
(3) Has all interest owners been notified by certified mail of the proposed commingling? ☒ Yes ☐ No
(4) Measurement type: ☒ Metering ☒ Other (Specify) Gauging

(C) POOL and LEASE COMMINGLING
Please attach sheets with the following information

- (1) Complete Sections A and E.

(D) OFF-LEASE STORAGE and MEASUREMENT
Please attached sheets with the following information

- (1) Is all production from same source of supply? ☒ Yes ☐ No
(2) Include proof of notice to all interest owners.

(E) ADDITIONAL INFORMATION (for all application types)
Please attach sheets with the following information

- (1) A schematic diagram of facility, including legal location.
(2) A plat with lease boundaries showing all well and facility locations. Include lease numbers if Federal or State lands are involved.
(3) Lease Names, Lease and Well Numbers, and API Numbers.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

Subject: EAGLE RESOURCES CLEAN-UP

Mr. Frank Morgan,

I would like to thank you for meeting with me to do inspections of the wells in the Tule Field located Northeast of Elida, NM. My inspections entered into OCD RBDMS reflect that your company has completed extensive clean up to each well and the compressor location.

As noted on the approved C-144, dated May 28, 2008 you have removed the visible pit lining, added top soil, returning to natural contour and re-seeded each of the old pit areas.

Not only has all surplus or junk equipment been removed, it is noted that all roads have been rebuilt with additional calachi and graded with contour to allow for drainage. The area at the compressor and now tank battery site was improved with the addition of calachi pad, plastic lined and bermed containment area for tanks, new fencing to protect equipment from livestock.

As per our discussion the Stoltenberg #1, API# 30-041-20809 has a current status of T/A (temporary abandonment) and will expire August 17, 2009.

Again thank you for continuing to work on this project until completion. You and your company have an operation that you can be proud of.

Thank,
Maxey G. Brown

Re: Off-lease Storage, Measurement, and Sales & Commingling the following Tule Leases:
Cook #1, Wendell Best #1, J.T. McGee #1, Speight #1, Perry #1, Morrison #1, & Stoltenberg #1
all in Roosevelt County New Mexico.

To Whom It May Concern:

Eagle Resources, LP is proposing to surface commingle the off-lease metering, storage, and sales of production from the leases above. All production will be commingled and allocated using periodic but not less than monthly well tests. This will maximize production and revenues to all interest owners by extending the economic life of the wells and will also minimize the environmental impact of existing production and future development. As an interest owner in the subject wells, pursuant to NMOCD rules and regulations, you are required to provide your consent to the proposed commingling of production from these wells. I have attached Eagle's application and enclosures that are to be filed with the NMOCD.

Please indicate your approval by signing in the space below and returning one copy of this letter to this office in the enclosed envelope. The second copy is for your files. If you have any objections to this request they must be filed with the Santa Fe district office within 20 days from the date the division received the application. Your prompt attention to this matter will be greatly appreciated.

Sincerely,

Jennifer Zapata
Production Analyst

Ezeanyim, Richard, EMNRD

From: Ezeanyim, Richard, EMNRD
Sent: Wednesday, November 19, 2008 4:34 PM
To: 'Jennifer Zapata'
Subject: RE: Eagle Resources Surface commingling

Jennifer:

I am still waiting for the information requested. Frank should be able to supply the information readily.

I need to know if the wells are producing from two pools or one pool. Is production from the Montoya or the Pennsylvanian formation? It appears that the Stoltenberg # 1 will produce from San Andres formation after work-over. If these assertions are correct, then your application should be Pool-Lease-Commingling (PLC) not just CTB. Please clarify ASAP.

Where is the location of the CTB? Will oil and gas be commingled at the same location? The location of the CTB should include the Unit Letter, Section, Township, and Range.

I have been waiting for these information as we discussed over the phone. Please send the information requested in this e-mail by close of business (COB) tomorrow 11/20/2008. Thank you and have a pleasant day.

Richard

Subject: Eagle Resources Surface commingling

I have updated the application attached. Frank told me that he needed to get some information and send it to you but he is out of the office today. I wanted to make sure you get this now and when he is in I will get the other information for you. Sorry for the inconvenience.

To: Ezeanyim, Richard, EMNRD
Subject: Eagle Resources Surface Commingling
Attachments: c107brev2.DOC

I hope this is correct. If you need anything else please give me a call.
Location of the CTB is: Unit Letter P; Section 28, T2S, R29E (Fee surface)

Thanks,

Jennifer R. Zapata
