**Lori Wrotenbery**  
Director  
**Oil Conservation Division**

*Administrative Order NSL-4962*

Dear Ms. Corley:

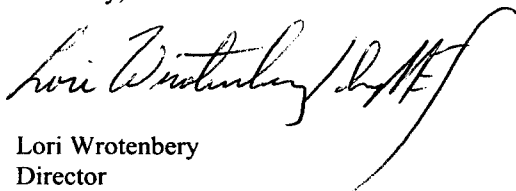

Reference is made to the following: (i) your application submitted to the New Mexico Oil Conservation Division ("Division") on October 31, 2003 (*administrative application reference No. pMES0-330732647*); and (ii) the Division's records in Santa Fe: all concerning BP America Production Company's ("BP") request for an exception to the well location requirements provided within the "*Special Rules for the Blanco-Mesaverde Pool*," as promulgated by Division Order No. R-10987-A, issued in Case No. 12069 and dated February 1, 1999, as amended by Division Order No. R-10987-A (1), dated December 2, 2002, for BP's proposed Florance Well No. 45-B to be drilled at an unorthodox infill gas well location 670 feet from the North line and 550 feet from the East line (Unit A) of Section 22, Township 30 North, Range 8 West, NMPM, Blanco-Mesaverde Pool (72319), San Juan County, New Mexico.

The Blanco-Mesaverde gas production from this well is to be included within an existing standard 320-acre stand-up gas spacing and proration unit ("GPU") comprising the E/2 of Section 22, which is currently dedicated to BP's: (i) Florance Well No. 45 (API No. 30-045-09352), located at a standard gas well location 1550 feet from the North line and 1500 feet from the East line (Unit G) of Section 22; and (ii) Florance Well No. 45-A (API No. 30-045-22130), located at a standard infill gas well location 1530 feet from the South line and 1470 feet from the East line (Unit J) of Section 22.

This application has been duly filed under the provisions of Division Rules 104.F and 605.B and the applicable rules governing the Blanco-Mesaverde Pool.

By the authority granted me under the provisions of Division Rule 104.F (2), the above-described unorthodox Blanco-Mesaverde infill gas well location for the proposed Florance Well No. 45-B is hereby approved. Further, all three of the aforementioned Florance Wells No. 45, 45-A, and 45-B, and existing 320-acre GPU will be subject to all existing rules, regulations, policies, and procedures applicable to prorated gas pools in Northwest, New Mexico and to the Blanco-Mesaverde Pool.

Sincerely,

Lori Wrotenbery  
Director
