Application for Non-Standard Well Location Florance Well No. 45B E/2 Section 22-T30N-R08W Blanco Mesaverde Pool San Juan County, New Mexico

BP America Production Company respectfully requests an administrative approval for a non-standard well location for the Florance Well No. 45 to be drilled at a location of 670' FNL and 550' FEL of Section 22, T30N-R08W. The non-standard location is necessitated by topographical, pipelines, and archeological conditions and would insure the conservation of surface and subsurface resources in the area. Additionally the subject well is staked on and existing well pad - the Florance A # 1R was drilled and completed into the Fruitland Coal Pool under Administrative Order NSL – 3450.

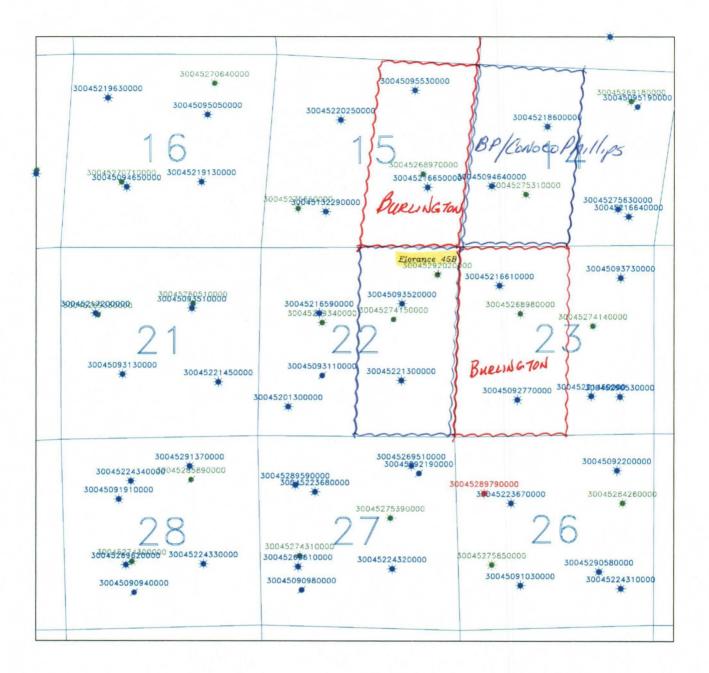

To aid in your review attached is a C-102 Well Location Plat showing the well location and identifying the existing Mesaverde well locations within the E/2 of Section 22, a topographical map, and a 9-section plat showing the offset wells and operators.

Offset operators as identified on the 9-Section plats are being notified this date of our intent via certified mail return receipt requested.

Your attention to this matter is greatly appreciated. Should you have any questions concerning this application please do not hesitate to call me at 281-366-4491.

Sincerely. Mary Corley
