If a Watercourse was Impacted, Describe Fully.*:

WATER @ 150'

Describe Cause of Problem and Remedial Action Taken.*: Packing leak at the wellhead. Packing was repaired. No fluids could be recovered.

Describe Area Affected and Cleanup Action Taken.*: Release was confined largely to an are ~10' in diameter around the wellhead. A portion of the spill migrated west in a small finger for ~20'. Plan is to remove and blend impacted soils where chlorides/TPH are less than 500/1000 mg/kg. Oil Gator and calcium nitrate (biological degradation additive and sodium ammendment) will be added to the blended material along with clean fill. The blended material will be placed back into the excavation once the material has reached remedial objectives.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
