Describe Cause of Problem and Remedial Action Taken.* Tank overfill & high level alarm failure. Storage tank is bypassed while operations group investigates cause of alarm failure. Tank will be put back in service once problem is identified & fixed.

Describe Area Affected and Cleanup Action Taken.* The area inside the tank dike & north of tank. The area north of the tank had a light oil cover due to wind blowing oil from top of tank. Free product was vacuumed. Contaminated soil was excavated & placed on plastic. Samples were taken. Soil will be removed depending on lab analysis.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
