Re: Elliott B Federal #21 Unorthodox Location
Section 6-T22S-R37E
Lea County, NM

Mr. Jones,

Range requests administrative approval of an unorthodox location for the subject well located as follows:

230' FSL & 1,030' FEL
Unit P, Section 6-T22S-R37E

This request places the subject well 230' from the south boundary and 290' from the west boundary of Unit P (40-acre tract) in lieu of 330' from the unit line as per field rules for the ~~under~~ Wantz Abo, Drinkard, Tubb Oil & Gas, and Blinebry Oil & Gas pools. There is currently only one other well producing from this pool in this unit, the Elliott B Federal #13, located 990' FSL & 330' FEL. This portion of Range's Elliott B Federal lease covers the N/2 of the SE/4 and the SE/4 of the SE/4 of Section 6 with common ownership in the 120 acres from surface to 7,450'. Range also has a lease in the SW/4 of the SE/4 of Section 6 with rights from 3,850' to 7,450. Range's leases to the south only cover rights from the San Andres and shallower. As a result, the requested location which is 230' FSL encroaches upon outside parties in the Drinkard, Tubb Oil & Gas, and Blinebry Oil & Gas pools. However, these outside parties are not producing from these pools nor do they have wells drilled in these pools in the offset unit.

Range Operating New Mexico, Inc. is the surface owner of the SE/4 of Section 6 and the NE/4 of Section 7.

Range cannot place this well in a manner that shares the location pad with the non-Blinebry/Tubb/Drinkard/Abo producing wells in this unit because those locations either do not have adjacent space or do not belong to Range Resources. The original location of this well was slated for 330' FSL and 330' FWL of Unit P but had to be moved due to a buried water line that would affect location construction.

Attached to this letter is a map detailing Range's lease and the wells surrounding the proposed Elliott B Federal #21 along with a spreadsheet cross-referencing the last five API digits with the wells' corresponding information. Also attached is the plat for the proposed well.

Given the reasoning above and the surface issues, Range would appreciate your consideration of this location.

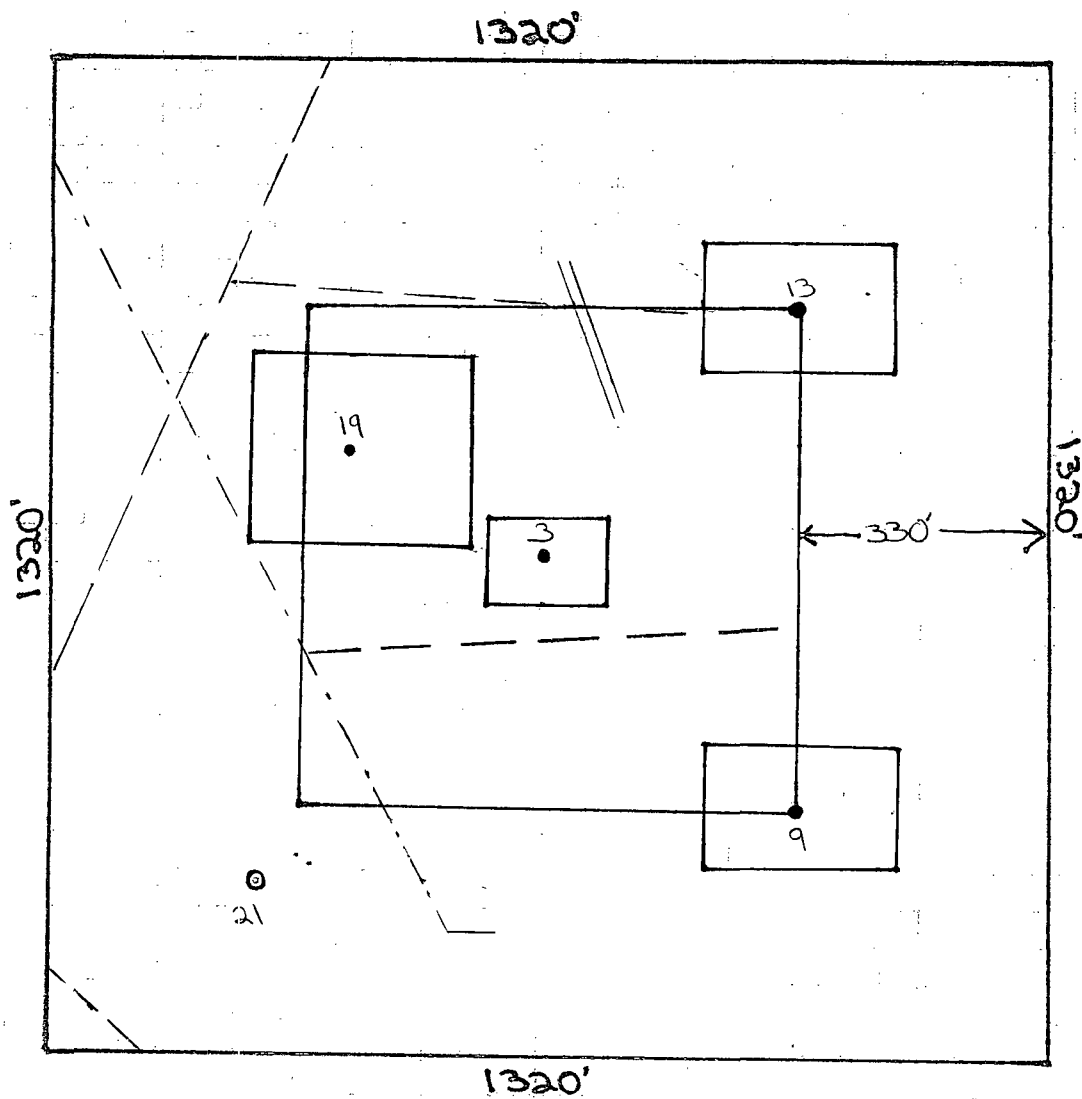

Sincerely,

A handwritten signature in black ink that reads "Deanna Poindexter". The signature is fluid and cursive, with the first name and last name clearly legible.

Mr. Jones,

Range requests administrative approval of an unorthodox location for the subject well located as follows:

230' FSL & 1,030' FEL
Unit P, Section 6-T22S-R37E

This request places the subject well 230' from the south boundary and 290' from the west boundary of Unit P (40-acre tract) in lieu of 330' from the unit line as per field rules for the Wantz Abo, Drinkard, Tubb Oil & Gas, and Blinebry Oil & Gas pools. There is currently only one other well producing from this pool in this unit, the Elliott B Federal #13, located 990' FSL & 330' FEL. This portion of Range's Elliott B Federal lease covers the N/2 of the SE/4 and the SE/4 of the SE/4 of Section 6 with common ownership in the 120 acres from surface to 7,450'. Range also has a lease in the SW/4 of the SE/4 of Section 6 with rights from 3,850' to 7,450'. Range's leases to the south only cover rights from the San Andres and shallower. As a result, the requested location which is 230' FSL encroaches upon outside parties in the Drinkard, Tubb Oil & Gas, and Blinebry Oil & Gas pools. However, these outside parties are not producing from these pools nor do they have wells drilled in these pools in the offset unit.

Range Operating New Mexico, Inc. is the surface owner of the SE/4 of Section 6 and the NE/4 of Section 7.

Importance: High

Mr. Brooks,

You had advised that our file for the application for an unorthodox location on the Elliott B Federal #21, Lea County, New Mexico, would retain its active status upon receiving our additional notices to offset operators. This information was e-mailed to you and sent via Fedex on January 16th. Since it has been more than 30 days we looked on the OCD web-site and cannot find an approval for our application. We are now wondering whether there is another problem we are not aware of that may be holding up the approval. We would appreciate any advice or information you can give us.

Thank you so much.

Dear Ms. Poindexter

My understanding is that you are requesting approval of the proposed location of this well in the Abo, Drinkard, Tubb and Blinbry formations. Is this all?

You have indicated that there are other parties that own working interests in the N/2 of Section 7-22S-37E, towards which this location will encroach. It is necessary that these parties be notified of the application, as provided in Rules 15.13.D and 4.12.A(2). Since there are no wells on this acreage in these formations, and therefore no designated operator, notice to all working interest owners is required.

As to the SW/4 SE/4 of Section 6, your letter is not clear as to whether Range owns 100% of the working interest, or whether ownership is this quarter section is identical with the 120 acres that includes the SE/4 SE/4 of Section 6. Please clarify this. If there are working interest owners in the SW/4 SE/4 who are not owners in the SE/4 SE/4, they also are entitled to notice of the application.

Please notify the necessary parties and furnish us with proof of notice when this has been done.

Sincerely

Mr. Brooks,

I called you to discuss exactly who needed to be notified on the southern offset to this NSL so that Range could pursue that data and notify the respected working interest owners. That phone call took place the same day that you e-mailed me (12/23/08).

I am requesting that you please do not close this file. Our landman supplied the information for the offset working interest owners on Tuesday, January 13, and we are noticing those owners tomorrow. I will be able to supply the proper amendments to this application at that time.

Please advise.
