Hello Lorri:

Received and reviewed the two new DHC applications from XTO in Farmington.

The perforation depth ranges fall into the 150% rule and require pressure numbers.

Please ask your engineers to do their best to estimate the reservoir pressure in all intervals (Pools) being commingled and send these numbers to me.

Remind them we are also still waiting on the pressures for the Breech F #8 and Breech #224.

Thank You,

Subject: Downhole Commingle Applications: Breech F #8 and Breech #224

Hello Lorri:

Please ask your engineer to estimate the static reservoir pressure and the means of arriving at these pressures for the Pictured Cliffs, Chacra, and Mesaverde in both these wells and send these numbers to me by reply email.

The perforation range is above the 150% rule and requires pressure data and verification that if the well is shutin for any reason, that any of these intervals will not fracture the other s - prior to approval.

I will prepare the orders, but hold them pending this data.

Thanks,
