Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\***D&D Construction, in the course of constructing a pipeline for Navajo Refinery which crossed the affected ROC line, employed a grid roller machine. The weight of this machine broke the ROC line when it crossed it. A vacuum truck was immediately dispatched to remove and properly dispose fluid, and the line was patched as a permanent repair.**

Describe Area Affected and Cleanup Action Taken.\***2898 sq ft of pipeline ROW was impacted. The source area was excavated on 3/9/09 to below the wet area caused by the accidental discharge. The entire area was scraped on 3/16/09 to 8in-1ft BGS, to a layer of solid caliche. Field sampling has demonstrated that salt water impact was confined to loose material above this layer only. Impacted soil was stored on site on plastic sheeting pending final disposal. On 3/18-20/09, 96 yds of impacted soil were hauled to Sundance disposal facility and , 96 yds of clean sand were brought in and used to backfill the excavation. The site, which is confined to the Navajo pipeline right-of-way, will be seeded simultaneously with the rest of the pipeline.**

<sup>1</sup>The vacuum truck responding to the spill was used to drain the pipeline for repair as well as remove standing fluid. No separate measurement of fluid recovered from the ground was made.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*D&D Construction, in the course of constructing a pipeline for Navajo Refinery which crossed the affected ROC line, employed a grid roller machine. The weight of this machine broke the ROC line when it crossed it. A vacuum truck was immediately dispatched to remove and properly dispose fluid, and the line was patched as a permanent repair.

Describe Area Affected and Cleanup Action Taken.\* 2898 sq ft of pipeline ROW was impacted. The source area was excavated on 3/9 to below the wet area caused by the accidental discharge. The entire area was scraped on 3/16 to 8in-1ft BGS, to a layer of solid caliche. Field sampling has demonstrated that salt water impact was confined to loose material above this layer only. Impacted soil will be hauled to A New Mexico approved disposal facility, and removed soil will be replaced with uncontaminated soil.

<sup>1</sup>The vacuum truck responding to the spill was used to drain the pipeline for repair as well as remove standing fluid. No separate measurement of fluid recovered from the ground was made.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
