RE: *Injection Pressure Increase*
Southeast Maljamar Grayburg/San Andres
Unit Well No. 908
API No. 30-025-33593
Lea County, New Mexico

Dear Mr. Hedrick:

Reference is made to your request dated June 28, 2001 to increase the surface injection pressure on the above referenced well. This request is based on a step rate test conducted on the well on June 21, 2001. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on this well is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following well:

<i>Well and Location</i>	<i>Maximum Surface Injection Pressure</i>
Southeast Maljamar Grayburg/San Andres Unit Well No. 908	1250 PSIG
Located in Unit A of Section 32, Township 17 South, Range 33 East, Lea County, New Mexico.	

Injection Pressure Increase
XTO Energy Inc.
SEMGBSAU No. 908
July 18, 2001

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

Lori Wrotenbery
Director
