UPDATE

Form C-141  
Revised October 10, 2003

Submit 2 Copies to appropriate  
District Office in accordance  
with Rule 116 on back  
side of form

**Release Notification and Corrective Action**

**OPERATOR**

Initial Report  Final Report

Name of Company	EnerVest Operating LLC	Contact	Elroy Ardoin
Address	1001 Fannin Street, Suite 800, Houston, TX 77002	Telephone No.	(713) 495 6534
Facility Name	Union SI Federal #2 - Tank Battery	Facility Type	Pump Jack & Tank Battery

Surface Owner - Mayes Jenkins Sr.	Mineral Owner - BLM	Lease No. 30-005-20866
-----------------------------------	---------------------	------------------------

**LOCATION OF RELEASE**

Unit Letter	Section	Township	Range	Feet from the	North/South Line	Feet from the	East/West Line	County
C	1	08S	31E	660		1980		Chaves

Latitude N 33.65445 Longitude W-103.72925

**NATURE OF RELEASE**

Type of Release – Historic oil spill/leak before current Owner	Volume of Release estimated 50bbls	Volume Recovered – 0 bbls - Historic oil spill/leak before current Owner
Source of Release – flow line spill/leak	Date and Hour of Occurrence	Date and Hour of Discovery
Was Immediate Notice Given? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Historic oil spill/leak before current Owner	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

EnerVest Operating purchased this lease in 2008 from Texas ReExploration. Texas ReExploration filed the original c141 and a sundry notice with BLM. This began the process for voluntary remediation. Texas ReExploration did not go beyond the point of reporting the historic spill/leaks. EnerVest Operating has continued the remediation process with on going cooperation with BLM Roswell office. EnerVest Operating contracted a sampling investigation and has submitted the results to the OCD and BLM. EnerVest Operating is at the point of backfilling the area immediately behind the storage tanks – upon OCD and BLM approval. The area behind and to the west of the storage tanks has been planned and approved by BLM for a land farm operation. The land farm will be put in place upon OCD approval as well. No new spills or leaks have occurred during the ownership of EnerVest Operating.

Describe Area Affected and Cleanup Action Taken.\*

The affected area was primarily impacted by hydrocarbons and minor chlorides as indicated in the sampling investigation. This spill site is historic with no free standing hydrocarbons present. Water run off has typically drained into this area due to topography. A caliche berm was constructed to better control water runoff coming through the contaminated area and provide secondary containment for storage tanks. A sampling investigation has been conducted with results submitted to OCD and BLM.

The contaminated surface area/s consists of three sections which include:

1. Drainage area inside fence, immediately behind storage tanks – 30ft X 140ft – saturated soils with hydrocarbons – dig and haul operation – contaminated soil has been removed to Gandy's disposal. Report submitted to OCD & BLM Waiting approval to backfill.
2. Area immediately outside of fence – south of storage tanks – 40ft X 100ft – dry hydrocarbons – scheduled to land farm
3. Area immediately south and southwest of storage tanks – 210ft X 110ft. - dry hydrocarbons – scheduled to land farm

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCDC rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCDC marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCDC acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
