Latitude N 33.66961 Longitude W-103.75854

NATURE OF RELEASE

Type of Release - Produced Water/Saltwater	Volume of Release – estimated 10bbbls	Volume Recovered - 0bbbls
Source of Release – Flow Line	Date and Hour of Occurrence. ?	Date and Hour of Discovery 4/2/08
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour -	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.*		

Describe Cause of Problem and Remedial Action Taken.*
This c141 is an update to the original spill report. This spill was reported by previous operator Texas ReExploration. The spill was reported as approximately 10bbbls. The cause of the leak was a flowline failure which was repaired. Texas ReExploration had not begun field remediation operations. EnerVest Operating acquired this lease in 2008 and has begun the remediation in cooperation with BLM and OCD. Remediation action includes:

- Sampling investigation with results submitted to OCD and BLM
- Dig and Haul operations completed with lab results determining acceptable levels of chlorides and TPH. Results submitted to OCD and BLM
- Currently awaiting OCD and BLM approval to backfill, return site to original topography and reseed.

Describe Area Affected and Cleanup Action Taken.* The approximate area effected is 10yds ft X 30yds. The spill ran across the lease road area and along side the storage tanks. The reported spill area with chloride contaminated soil was removed along with an historic oil spill/s which consisted of asphaltines and dry sandy hydrocarbons. Dig and Haul remediation operation was utilized with soil being disposed of at Gandy's disposal. Top soil was backhauled from Gandy's and staged on site. The next stage is to backfill excavated area.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
