Re: Application for dual completion
and for a 40-acre non-standard
gas unit - Wisner Rinewalt B No. 1
Sec. 4, Twp. 22-S, Rge. 37-E
Lea County, New Mexico

Gentlemen:

Enclosed is an application to dual complete our Rinewalt B No. 1 in the Blinebry gas and Tubb gas pools, Lea County, New Mexico. Also, please consider this an application for a 40-acre non-standard gas proration unit to be dedicated to the subject well for Tubb gas production. As seen by the attached plat, the well is located in Unit D, Section 4, Township 22 South, Range 37 East, Lea County, New Mexico, and the proposed 40-acre unit will consist of the Northwest Quarter of the Northwest Quarter of Section 4.

As illustrated by the diagrammatic sketch, the Tubb gas will be produced through tubing and the Blinebry gas will be produced through the tubing-casing annulus, similar to the dual completion approved by Commission Order No. DC-680 on the Mobil No. 2 J. N. Carson.

All operators listed in Item 5 of the application have been furnished a copy of this letter and application. Please advise if additional information is desired concerning this request.

Very truly yours,

B. C. Hicks
