**Re: Rosa Unit Well No. 183C
API No. 30-039-30764
2330 feet FNL and 305 feet FEL
Unit H, Section 19-31N-5W
Rio Arriba County, New Mexico**

Dear Ms Riley:

Reference is made to the following:

(a) your application (**administrative application reference No. pWVJ09-27157039**) submitted to the New Mexico Oil Conservation Division (the Division) in Santa Fe, New Mexico on September 28, 2009, and

(b) the Division's records pertinent to this request.

Williams Production Company [OGRID 120782] (Williams) has requested to drill the above-referenced well at an unorthodox gas well location described above in the caption of this letter. Lots 1 and 2 and the NE/4 [N/2 equivalent] of irregular Section 19 will be dedicated to this well in order to form a non-standard 240-acre, more or less, spacing unit in the Basin-Mancos Gas Pool (97232) and the Basin-Dakota Gas Pool (71599). Spacing in the Basin Mancos Gas Pool is governed by the Special Rules for the Basin-Mancos Gas Pool, as promulgated in Order R-12984, issued on September 3, 2008, which provide for 320-acre units, with wells located at least 660 feet from a unit outer boundary. Spacing in the Basin Dakota Gas Pool is governed by Rules II.A and II.C of the Special Rules and Regulations for the Basin-Dakota Gas Pool, as most recently amended by Order No. R-10987-B(2), issued on January 29, 2002, which also generally provide for 320-acre units, with wells located at least 660 feet from a unit outer boundary.

This location is less than 660 feet from the eastern unit boundary.

Pursuant to the authority conferred by Division Rule 15.13.B, the above-described unorthodox location is hereby approved.

This approval is subject to your being in compliance with all other applicable Division rules, including, but not limited to Division Rule 5.9.
