By Whom? NA Was a Watercourse Reached? Yes No If a Watercourse was Impacted, Describe Fully.* NA Describe Cause of Problem and Remedial Action Taken.* 20 bbl produced water spill occurred due to external corrosion of a buried 3" steel water transfer line. An emergency clamp was installed to stop the leak. Describe Area Affected and Cleanup Action Taken.* The release was contained primarily on the Site caliche pad, with some water flowing into a swale located adjacent to the west side of the pad. The affected area was delineated laterally and vertically and a "Findings Report" was written and submitted by Tetra Tech on October 29, 2009 to NMOCD. I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
