If a Watercourse was Impacted, Describe Fully.*

N/A

WATER @ 370'

Describe Cause of Problem and Remedial Action Taken.*

Refer to Initial C-141 for further details on initial spill volumes and cause. Soil samples and tests were gathered from the affected area. The results were discussed with NMOCD Personnel and it was agreed that the surface soils would be removed and disposed of at an approved disposal facility, and the area backfilled with clean like soils as needed. This site has been completed and closed.

Describe Area Affected and Cleanup Action Taken.*

Remediated to NMOCD Requirements.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
