**REQUEST FOR ADMINISTRATIVE APPROVAL FOR NON-STANDARD LOCATION  
FOR RICHARDSON OPERATING COMPANY  
WF STATE 2 #4  
2060' FSL & 2095 FEL, SECTION 2, TOWNSHIP 30 NORTH, RANGE 14 WEST, NMPM,  
SAN JUAN COUNTY, NEW MEXICO**

- 1) The referenced well is located on State Trust surface, State Trust minerals. The proposed location is non-standard because of proximity to large, deep canyons making a legal location physically impossible. According to NMOC rules well locations depending on formation drilled must be 660' from the quarter section lines. The well location is 2095' from the East Section line of Section 2, and approximately 2060' from the South Section line of Section 2. Therefore the WF State 2 #4 location is approximately 155' too far West and approximately 90' too far north. There is no physical location that would be legal because of topography. Richardson controls the Fruitland Coal and Pictured Cliffs rights in the S/2 of Section 2.
- 2) A C-102 (Exhibit "A") is attached showing the well location and the proration unit for the proposed Fruitland Coal/Pictured Cliffs well. Application for Permit to Drill (APD) (C-101) for this well was submitted to the State of New Mexico via E-Permitting on January 6, 2004. A copy is attached to this application. Adding the Fruitland Coal pursuant to Order No. R-8768-C (71629) was included to infill the existing Richardson WF State 2 #3 well as shown on the C-102. The Harper Hill Fruitland Sand (Gas) will be a new completion in this pool.
- 3) A map (Exhibit "B") is attached showing the adjoining spacing units and existing Fruitland Coal/Pictured Cliffs wells. Richardson controls the Fruitland/PC rights in the offsetting spacing units, with the exception of those controlled by Dugan Production Corp. et al as shown on Exhibit "B".
- 4) Certified letters have been sent to offsetting operators to notify them of our intentions. Copies of the letters are attached to this application.
- 5) Existing land use concerns, specifically topography, force a non-standard location exception for this action. It would not be feasible to build a legal location to drill this Fruitland Coal/Pictured Cliffs well.
- 6) Archaeology is not an issue with this well.
- 7) Directional drilling is not feasible for such a shallow completion.
- 8) A non-standard location is requested because of surface conditions, i. e., topography.
- 9) I hereby certify that notice was sent to the following offset operators, leaseholders or Surface Owners which adjoin the applicant's spacing unit.

Gentlemen:

As required by New Mexico Oil Conservation Division (NMOCD) Rules, this letter will serve to notify you of the following non-standard location application for a well. This letter is a notice only. No action is required on your part unless you have questions or objections. Any objections must be filed in writing within 20 days of receipt of the application by the NMOCD.

Richardson Operating Company is applying to the NMOCD for a non-standard location for its proposed Richardson Operating WF Federal 2 #4 well in the Fruitland Coal/Pictured Cliffs formation. The minimum distance from quarter section lines required by NMOCD rules is 660'. Due to existing surface conditions (topography), the well is approximately 155' to far West and approximately 90' too far north. A legal location is not physically possible.

Gentlemen:

As required by New Mexico Oil Conservation Division (NMOCD) Rules, this letter will serve to notify you of the following non-standard location application for a well. This letter is a notice only. No action is required on your part unless you have questions or objections. Any objections must be filed in writing within 20 days of receipt of the application by the NMOCD.

Richardson Operating Company is applying to the NMOCD for a non-standard location for its proposed Richardson Operating WF Federal 2 #4 well in the Fruitland Coal/Pictured Cliffs formation. The minimum distance from quarter section lines required by NMOCD rules is 660'. Due to existing surface conditions (topography), the well is approximately 155' to far West and approximately 90' too far north. A legal location is not physically possible.
