Describe Area Affected and Cleanup Action Taken.*

The affected area was the area directly underneath the pit liner and the lower portion of the pit walls. The pit was excavated to a final depth of 7'BGS. The OK to backfill was given by Larry Johnson, NM OCD. The pit was backfilled with clean material from a nearby source contoured to match the existing location.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
