Subject: RE: Groundwater Status Report Approval (1R-2136) - Plains DCP Plant to Lea Station 6-Inch #2 Release Site

Mr. Hansen,

Pursuant to the NMOCD request to conduct weekly PSH recovery at the Plains DCP Plant to Lea Station 6-Inch release site, Plains has been conducting PSH recovery twice per week at the site. The Groundwater Status Report mistakenly stated PSH recovery was conducted bi-weekly, when it should have stated twice weekly. I apologize for the inconvenience this has caused. Please contact me with any questions.

Sincerely,
Camille Bryant
Project Manager

**RE: Groundwater Status Report Approval
for the Plains Marketing, L.P.
DCP Plant to Lea Station 6-Inch #2 Release Site (1R-2136)
Unit Letter F, Section 31, T20S, R37E, NMPM, Lea County, New Mexico**

Dear Mr. Henry:

The New Mexico Oil Conservation Division (OCD) has reviewed the submitted Groundwater Status Report, dated July 27, 2010, for the above-referenced site. The OCD hereby conditionally approves the report:

Plains Marketing, L.P. shall increase the bi-weekly non-aqueous phase liquid recovery frequency to at least once per week at each well where non-aqueous phase liquid is currently being recovered (i.e., MW-1).

Please be advised that OCD approval of this report does not relieve the owner/operator of responsibility should operations pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the owner/operator of responsibility for compliance with any OCD, federal, state, or local laws and/or regulations.

If you have questions regarding this matter, please contact me at 505-476-3489.

Subject: GW Remediation Workplan Approval (1R-2136) - Plains DCP Plant to Lea Station 6-Inch #2 Release Site

**RE: Groundwater Remediation Workplan Approval
for the Plains Marketing, L.P.
DCP Plant to Lea Station 6-Inch #2 Release Site (1R-2136)
Unit Letter F, Section 31, T20S, R37E, NMPM, Lea County, New Mexico**

Dear Mr. Henry:

The New Mexico Oil Conservation Division (OCD) has received the Initial Groundwater Status Report, dated September 11, 2009, and the 2009 Annual Monitoring Report, dated March 2010 (including "Anticipated Actions", workplan) for the above-referenced site, and has conducted a review of the plan. The workplan substantially meets the requirements of 19.15.29 NMAC. Therefore, the OCD hereby conditionally approves the workplan:

Plains must submit to the OCD a groundwater status report for the first two quarters of 2010 (with proposed possible further delineation, if warranted, and corrective actions) within 60 days.

Please be advised that OCD approval of this workplan does not relieve the owner/operator of responsibility should operations pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the owner/operator of responsibility for compliance with any OCD, federal, state, or local laws and/or regulations.

If you have any questions regarding this matter, please contact me at 505-476-3489.
