It is the Division's understanding that Devon permitted its Old Ranch Canyon "7" Federal Well No. 7 in January, 2003 to be directionally drilled from a surface location 1598 feet from the North line and 1097 feet from the West line (Lot 2/Unit E) of Section 7 to a standard bottom-hole location within the Indian Basin-Upper Pennsylvanian Associated Pool 660 feet from the North and West lines (Lot 1/Unit D) of Section 7.

However, it was determined after drilling to a total depth of 8,300 feet (MD) that the bottom-hole location of this well was 625 feet from the North line and 700 feet from the East line (Lot 1/Unit D) of Section 7.

This request been duly filed under the provisions of: (i) Division Rule 104.F, revised by Division Order No. R-11231, issued by the New Mexico Oil Conservation Commission in Case No. 12119 on August 12, 1999; (ii) Division Rule 111.C (2); (iii) Division Rule 1207.A; and (iv) Rule 2 (c) of the Division's associated pool rules.

By the authority granted me under the provisions of Division Rule 104.F (2) and the applicable provisions of the special rules governing the Indian Basin-Upper Pennsylvanian Associated Pool, the above-described unorthodox bottom-hole location for Devon's Old Ranch Canyon "7" Federal Well No. 7 within the (W/2 equivalent) of Section 7 is hereby approved. Further, both the aforementioned well and spacing and proration unit will be subject to all existing rules, regulations, policies, and procedures applicable to the Indian Basin-Upper Pennsylvanian Associated Pool.

Devon is hereby authorized to simultaneously dedicate production attributed to the Indian Basin-Upper Pennsylvanian Associated Pool from the aforementioned Old Ranch Canyon "7" Federal Wells No. 2, 4, and 7. Furthermore, Devon is permitted to produce the allowable assigned the subject 297.68-acre spacing and proration unit from all three wells in any proportion.

Jurisdiction of this cause is retained for the entry of such further orders as the Division may deem necessary.

Sincerely,
