**Attachments:** Murchison Carbon Valley Diesel release.doc

Lourdes,

Please find attached, a standard remediation proposal request for this release. The next step would be to determine the site ranking and perform a delineation of the impacted area. A proposal for remediation of the site would then be formulated and submitted for OCD review.

If you have any questions or concerns, please contact me.

Mike,

Attached is the lab report for the samples collected at the Murchison Oil Lease in Artesia. The data shows that four of the samples had only trace amounts of TPH and BTEX compounds. Sample 1 had a total TPH of 13,740 mg/Kg and Sample 4 had a TPH of 11,240 mg/Kg. Our draftsman is preparing a drawing on the sampling location but attached is the field sketch showing sample locations. Let me know if you need anything further at this time.

Regards,

Victor Ayala  
Environmental Manager  
D&H Petroleum & Environmental Services
