Describe Cause of Problem and Remedial Action Taken.*

A storage tank containing condensate developed a hole in the bottom, fluid leaked out of this hole. A vacuum truck was called to pick up standing fluids. The battery was lined.

Describe Area Affected and Cleanup Action Taken.*

An approximate size of 100' x 25' was impacted. The impacted area is located around the tanks within the berm. Soil from the pooling areas will be excavated and disposed of at an NMOCD approved facility. Crews excavating contaminated soils will place directly onto plastic. Vertical and horizontal delineation samples will be taken and analysis run for TPH and BTEX once all contaminated material has been removed. Chlorides upon request. Depth to Ground Water: <50' (approx. 32', per New Mexico Office of the State Engineer); Wellhead Protection Area: No; Distance to Surface Water Body: >1000'; SITE RANKING IS 20. Based on site ground water quality and enclosed analytical results.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations
