Re: Hall Unit -S/2 Section 20,

County, New Mexico

Gentlemen:

The captioned section is non-standard and the S/2 of said section contains only 293.47 acres instead of the usual 320 acres. The Spacing for a Dakota test in this area is 320 acres and being as we are short acreage the New Mexico Oil Conservation Commission requires that we obtain permission from all offset operators before they well approve the communitization agreement.

If you have no objection to same would you please so signify in the space provided below.

Yours very truly,

ADOBE OIL COMPANY
