**Re: New Mexico S State Well No. 56  
 API No. 30-025-38120**

**Pool: Penrose Skelly; Grayburg Oil (50350)  
 undesignated South Eunice; San Andres Oil (24170)**

Dear Ms. Holland:

Reference is made to your application for an exception to Division Rule 12.9A. to permit down hole commingling of production from the subject pools within the above-described wellbore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 12.11A., and that reservoir damage or waste will not result from such down hole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described.

In accordance with Division Rule 12.11A(6), the production attributed to any commingled pool within the well shall not exceed the allowable applicable to that pool.

Assignment of allowable and allocation of production from the well shall be as follows:

Penrose Skelly; Grayburg Pool	Pct Gas: 50%	Pct Oil: 52%
South Eunice; San Andres Pool	Pct Gas: 50%	Pct Oil: 48%

Oil Conservation Division  
 1220 South St. Francis Drive • Santa Fe, New Mexico 87505  
 Phone (505) 476-3440 • Fax (505) 476-3462 • [www.emnrd.state.nm.us/OCD](http://www.emnrd.state.nm.us/OCD)

It is our understanding that the above allocation percentages are based on historical production from this well in the San Andres and from offsetting wells in the Grayburg.

It is also understood that ownership of all interest in the pools from which production is being commingled is identical.

The operator shall notify the Division's Hobbs district office upon implementation of commingling operations.

Pursuant to Rule 12.11B, the commingling authority granted herein may be rescinded by the Division Director if conservation is not being best served by such commingling.

MARK E. FESMIRE, P.E.  
Acting Director
