Describe Cause of Problem and Remedial Action Taken.*					
A 1" nipple broke on the bottom of the filter pot allowing water to release into containment. All fittings were replaced with new steel fittings to prevent reoccurrence.					
Describe Area Affected and Cleanup Action Taken.*					
Initially 15bbbls or produced was released from the broken 1" nipple on the filter pot and all fluid was contained inside the dike walls of the facility which is lined with a 40 mil liner. The released fluid was recovered with a vacuum truck and disposed of appropriately. Any contaminated gravel will be removed and hauled to disposal. Clean gravel will be added as needed. We will follow up with a C-141 Final Report.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
