RE: Lease and Surface Commingling and Off Lease Measurement
Section 3 & 11, T20R, R33E, NMPM
Lea County, New Mexico

Nearburg Producing Company hereby requests administrative approval for Lease and Surface Commingling and Off Lease Measurement of the production from the wells listed on Attachment I.

The common tank battery for said wells is located in Unit D, 660' FNL and 760' FWL, Section 11, T20S, R33E, Lea County, New Mexico. All of subject wells and proration units are depicted on Attachment II. All wells are on 40 acres. Lease number (NM 17238). (Plats attached).

On March 15, 2000 we requested approval for the Anaconda 11 Federal #1 & 2, Python 3 Federal 1 & 3. All of the wells have been drilled and producing. On June 21, 2001 we requested approval to update the commingling permit for the Python 3 Federal 4, #5D, 6 and 7. All have been drilled and are producing.

All production will be metered on each individual well and the meters will be calibrated on a regular basis. All production that will be commingled will be produced from the Teas; Delaware and (1) one in the Bone Spring being the Python 3 Federal 5D.

The purpose of the Commingling and Off Lease Measurement is to reduce facility and operating costs, thereby increasing the economic life of the wells.

A diagram of the measurement equipment, separators and storage tanks is attached.

Thank you for your cooperation in this matter. If you have any questions, please feel free to contact the undersigned.

Very truly yours,

Kim Stewart
Regulatory Analyst

Encl.
