RE: **Application to Surface Commingle**
State Com AG #29E, API 30-045-24033
State Com Z #22, API 30-045-07700
Section 36, T29N, R10W
San Juan County, New Mexico

Gentlemen:

By way of this application, Conoco respectfully requests approval to surface commingle all zones currently completed in the above-mentioned wells. The "AG" 29E is currently downhole commingled in the Blanco Mesaverde and Basin Dakota and the "Z" #22 is an Aztec Pictured Cliffs single. Working, net revenue, and royalty interests are diversified; list is attached.

The following items are submitted in support of this application:

Exhibit A is a plat of the lease with the subject well identified.
Exhibit B contains production volume reports of zones completed in the well.
Exhibit C contains gas analysis reports for zones completed in the subject well.
Exhibit D is a schematic of the facilities for subject well.
Exhibit E is a copy of Administrative Order DHC-875 for State Com AG 29E.
Exhibit F is a list of interests owners. All have been notified by certified mail.

The current average gas production rate for the AG 29E commingled Mesaverde/Dakota is 380 MCFPD. The current average production for the Z 22 Pictured Cliffs is 5 MCFPD; the expected production with compression is 50 MCFPD. Allocation will be determined by separately metering. The Mesaverde/Dakota gas and oil production is allocated based on the current allocation shown in order DHC-875. Pictured Cliffs gas is dry, therefore, no oil will be allocated to this formation.

If you have any questions or require any further information, please feel free to contact me at (281) 293-1613.

Sincerely,

Yolanda Perez

Basin Dakota and Blanco Mesaverde Pools*

Dear Mr. Hoover:

Reference is made to your recent application for an exception to Rule 303-A of the Division Rules and Regulations to permit the subject well to commingle production from both pools in the wellbore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 303-C, and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion and required separation of the two zones is hereby placed in abeyance.

In accordance with the provisions of Rule 303-C-4., total commingled oil production from the subject well shall not exceed 40 barrels per day, and total water production shall not exceed 80 barrels per day. The maximum amount of gas which may be produced daily from the well shall be determined by Division Rules and Regulations or by the gas allowable for each respective prorated pool as printed in the Division's San Juan Basin Gas Proration Schedule.

Assignment of allowable to the well and allocation of production from the well shall be on the following basis:

Basin Dakota Pool	Oil	50%	Gas	33%
Blanco Mesaverde Pool	Oil	50%	Gas	67%

In accordance with the provisions of Rule 303-C, the supervisor of the Aztec District Office of the Oil Conservation Division shall determine the proper allocation of production from the subject well following its completion.

FURTHER: The operator shall notify the Aztec District Office of the Division upon implementation of the commingling process.

Pursuant to Rule 303-C-5, the commingling authority granted by the order may be rescinded by the Division Director if, in his opinion, conservation is not being best served by such commingling.

Approved at Santa Fe, New Mexico on this 11th day of February, 1993.
