If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

A broken 1x4 swedge was the cause of the release. The broken swedge has been replaced with a new one.

Describe Area Affected and Cleanup Action Taken.*

The entire release of 1822 bbls was completely contained within the boundary of the dike wall, which is lined with 40 mil plastic. A vacuum truck was called and recovered 1820 bbls of fluid. All contaminated gravel has been removed from the dike and hauled to the appropriate disposal facility. Clean gravel has been added to the facility as necessary. The facility has been returned to its prior condition.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
