Latitude 32 54.350 Longitude 104 09.130

**NATURE OF RELEASE**

Type of Release	Oil	Volume of Release	65bbbls	Volume Recovered	63bbbls
Source of Release	Swedge inside tank battery	Date and Hour of Occurrence	02/21/2011	Date and Hour of Discovery	02/21/2011 4:30 p.m.
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	Mike Bratcher—OCD		
By Whom?	Josh Russo	Date and Hour	02/22/2011 3:43 p.m.		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*  
Swedge failed on circulating line coming off of production tank. The swedge has been replaced with a new one.

Describe Area Affected and Cleanup Action Taken.\*  
Initially 65bbbls of oil was released and completely contained inside the walls of the facility. We were able to recover 63bbbls with a vacuum truck and all standing fluid has been recovered. The contaminated soil has been removed from the facility and the spill area measured 10' x 100'. Tetra Tech will sample the spill site area to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD / BLM for approval prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

**Subject:** Re: C-141 - Moose Federal TB: Question? and correct API #

I have received your notification of two spills contained within the berms of an unlined facility. Federal tracking numbers 11NU044TG and 11NU045TG respectively. Do these spills overlap in impact footprint, or do they affect two separate areas within the containment?

Also, the well name and API# referenced on the C-141 reports is a plugged and abandoned well. It would probably be better to tie this spill to the active well on the same pad. Correct well name and API: Moose 23 Federal 1Y, API #3001535755.
