Ike,

As discussed, you are approved to move forward with this project. BLM will likely be onsite for witnessing various aspects of the projects, but please keep me updated and advised on sampling events or problems encountered.

As always, OCD approval does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relive the operator of responsibility for compliance with any other federal, state , local laws and/or regulations.

Mike,

Just a reminder, Tetra Tech has scheduled the COG Spruce Federal #1 Tank Battery for Monday (3-14-11). On March 3, 2010, we reviewed and discussed the work plan in you office, with several other projects. The BLM has approved the plan and pending your approval. Let me know if you need additional time. I will need to send notifications on the startup date. Call me if you need a list of the sites we reviewed and discussed, thanks

Ike Tavarez

Mike and Terry,

Please find the enclosed attached work plan for your review. Once approved, Tetra Tech will setup the remediation as soon as possible. Call me if you have any questions or comments on the work plan. Thanks
