NATURE OF RELEASE

Type of Release Produced Water	Volume of Release 200 bbl PW	Volume Recovered 180 B/PW
Source of Release Load Line	Date and Hour of Occurrence 11/10/2009 am	Date and Hour of Discovery 11/10/2009 - PM
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher - NMOCD/Artesia	
By Whom? Amanda Trujillo - Yates Petroleum Corporation	Date and Hour 11/10/2009 pm	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. N/A	
If a Watercourse was Impacted, Describe Fully.* N/A		
Describe Cause of Problem and Remedial Action Taken.* On 11/10/2009 a change in normal volume caused a nipple to break. This break released 200 bbl of produced water. The majority of the water remained on location; some did flow off into the adjoining pasture. Immediately after the spill was reported a pump truck was able to recover 180 bbl.		
Describe Area Affected and Cleanup Action Taken.* An approximate area of 4050 ft <sup>2</sup> . The impacted area pooled on location before it breached the berm and pooled outside the berm, however still on location. The flow path continued into the adjoining pasture. A vacuumed truck was called and 180 bbls were recovered and disposed of properly. Soil from the pooling areas was excavated and disposed of at an NMOCD approved facility. Crew excavated contaminated soils, soils were placed with berm. Vertical and horizontal delineation samples have taken and analysis ran for TPH, BTEX and Chlorides. <b>Depth to Ground Water: &lt;100' (approx. 297', per New Mexico Office of the State Engineer); Wellhead Protection Area: No; Distance to Surface Water Body: &gt;1000'; SITE RANKING IS 0. Based on site ground water quality and enclosed analytical results.</b>		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
