NATURE OF RELEASE

Type of Release	Produced fluids	Volume of Release	25 bbls	Volume Recovered	15 bbls
Source of Release	Header	Date and Hour of Occurrence	02/15/2010	Date and Hour of Discovery	02/15/2010
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	Terry Gregston - BLM		
By Whom?	Ronnie Tice	Date and Hour	02/15/2010		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
The connection from the flowline to the header was defective. The failed header/flowline connection was repaired.

Describe Area Affected and Cleanup Action Taken.*
25 bbls of produced fluid was released at the faulty header connection in the form of free fluid on location or overspray into the pasture. 15 bbls of free fluid was picked up by a vacuum truck. One-call protocol will be made by dirt contractor who will then wait for archeological/ wildlife sensitivity clearance from BLM before removing any saturated soils prior to sampling by Tetra Tech.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
