## **Summary**

On 1-8-10 a spill was discovered at the Nagooltee Peak 5-3. Notification was made to Mike Bratcher with the NMOCD. As approved by the NMOCD and BLM, Oxy removed 2 feet of material around the separator and 1 foot of material from the remaining affected area. The excavated material was hauled to Lea Land for proper disposal and clean backfill was brought in. Attached to this document is the final C-141 and the process pictures during the excavation.
