Describe Cause of Problem and Remedial Action Taken.\*

When the compressor was turned, fluid in the flare line mixed with the gas passed by the pilot of the flare igniting the fluid causing fireballs to shoot into the pasture causing the fire.

Describe Area Affected and Cleanup Action Taken.\*

The area burned was approx 3 acres east of the North Indian Basin Unit Facility. 911 was called to respond to the fire, however Oxy field personnel extinguished the fire with portable fire extinguishers. Local Fire Departments arrived and continued to spray water on the hot spots. No clean-up is needed.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
