Santa Fe, New Mexico 87505

Re: Application of Mewbourne Oil Company for Administrative Approval of an Unorthodox Well Location and a non-standard spacing and proration unit for its Bradley "29" Federal Com Well No. #3H, a horizontal well to be drilled from an unorthodox surface location 1620 feet from the North line and 25 feet from the West line (Unit E) to an unorthodox bottom hole location 1650 feet from the North line and 330 feet from the West line on a non-standard spacing and proration unit comprised of the S/2 N/2 of Section 29, Township 18 South, Range 30 East, N.M.P.M., Eddy County, New Mexico.

Dear Mr. Sanchez:

Pursuant to the provisions of Oil Conservation Division General Rule 19.15.15.13 NMAC, Mewbourne Oil Company hereby seeks administrative approval of an unorthodox oil well location for its Bradley "29" Federal Com Well No. 3H to be drilled as a horizontal well at a point 1620 feet from the North Line and 25 feet from the West line to a true vertical depth of approximately 8216 feet with a measured depth of approximately 12,946 feet and then in an westerly direction with a lateral length in The Bone Spring formation of approximately 440 feet to an unorthodox bottom hole location 1650 feet from the North line and 330 feet from the West line of Section 29, Township 18 South, Range 30 East, N.M.P.M., Eddy County, New Mexico. This well will evaluate the Second Bone Sand interval in the Bone Spring formation which is the principal objective in the well. A 160-acre non-standard spacing and proration unit/project area comprised of the S/2 N/2 of Section 29 will be dedicated to the well in the Bone Spring formation.

This well is governed by the Special Rules and Regulations for the Santo Nino-Bone Spring Pool which provide for oil wells to be located on standard spacing units containing 80-acres with wells to be located within 150 feet of the center of a governmental quarter-quarter section or lot (Order No. R-8546). This well location is unorthodox in the Bone Spring formation to the North,

March 14, 2011

Page 2

East and West because its surface and bottom hole locations are less than 510 feet from the project area boundary – thereby closer than permitted by the applicable rules.

This unorthodox oil well location is required for topographic reasons. (Topographic Map attached as Exhibit D) The well was originally staked at a location 1650 feet from the North line and 150 feet from the West line of Section 29 which was in a large sand dune feature and was denied by the Bureau of Land Management. The BLM required Mewbourne to find a surface location on the East side of Section 29. The proposed unorthodox location has been BLM approved and arc cleared.

Attached hereto as Exhibit A is a plat showing the location of the subject spacing unit, the proposed unorthodox well location and adjoining spacing units and wells. Exhibit B is a copy of the Acreage Dedication Plat for the well (Division Form C-102) that shows the survey location of the well.

Exhibit C is a list of affected persons as defined in Paragraph (2) of Subsection A of 19.15.4.12 NMAC. A copy of this application, including all attachments, has been mailed to each of these offset operators/affected persons by certified mail-return receipt requested in accordance with Rule 19.15.4.12 A (2)(a). Each owner has been advised that if it has an objection to this application it must be filed in writing with the Division's Santa Fe office within twenty days from the date this notice was sent.

Your attention to this application is appreciated.

Very truly yours,

William F. Carr
