APR 28 2011

NMOCD ARTESIA

Describe Area Affected and Cleanup Action Taken.\*

The release was located on the Transfer line west of the Artesia Unit No. 34 well location. The weather at the time of the release was dry and windy. The impacted area was measured to be thirty-two feet (32') long by twenty-one feet (21') wide. Talon/LPE has been contracted for the construction of a work plan and the correction of the impacted area.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
