Mike,

Per the NMOSE, the closest well on record is in Section 28, T18S-R27E with a depth to ground water recorded at 100'. There was no produced water released (Released: 8 B/O; Recovered: 0 B/O). I will submit a Final C-141 and all analytical reports requesting closure.

Thank you.

Bob,

Based on the analytical data submitted, assuming a site ranking of zero, and no produced water released, OCD would approve this site for closure.

Mike,

Attached are sampling results at the captioned location. Impacted soils were excavated to a depth of four (4) feet; impacted soils were taken to an NMOCD approved facility. I would like to request these results be accepted for closure.

If you have any questions, please call me.

Thank you.
