RE: Surface Commingle of Federal Leases

To Whom It May Concern:

Mewbourne Oil Co is requesting permission to surface commingle the following wells:

Long Draw 4 J <sup>JKL</sup> # 1H (API # 30-015-37585) - N TRVRS; GWR Y 200 97565 " 120 acres"  
Fast Draw 4 # EH Fed Com # 1H (API # 30-015-38636) " " " " " 160 acres"

Mewbourne Oil Co request permission to produce these wells to a tank battery on our Long Draw 4 I # 1 (API # 30-015-37202) with our Long Draw 4 I # 1. ~~Long Draw 4 I # 1 (API # 30-015-37202)~~ <sup>3-015-37202</sup> <sup>(11795)</sup> <sup>abolished</sup> <sup>1/18/11</sup>

The reason for which Mewbourne Oil Co is requesting this off lease measurement is to save approximately \$150,000 in facilities cost as well as additional surface disturbances. Mewbourne Oil Co will allocate production based upon well test and metering.

- /Sundry Notice of intent
- /Copy of Form C107B submitted to NMOCD
- /Site diagram of production facility with pictures
- /Spreadsheet showing leases production & fluid characteristics
- /Explanation of testing procedure
- /Explanation of why commingle is needed (economics & footprint)
- /Form C-102 for leases
- /Map showing entire section and corresponding leases
- /Administrative Application Checklist
- /Letter Head statement on how com will not lower value of reserves
- /Letter Head Statement on how all parties have been notified
- /List of all involved parties

JKL  
EFGH  
I 40 acres

Mewbourne Oil Company would appreciate this commingle request being processed as soon as possible. If you need further information, please call me at (575) 390-4816.

Thank you,

A handwritten signature in black ink, appearing to read 'Robin Terrell', with a stylized, cursive script.

3. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomplate in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Mewbourne requests permission to surface commingle production from the above captioned well into our existing tank battery on our Long Draw 4 I Fed #1 (API 30-015-37202). Consider with following attachments.

## **Testing Procedure**

This production facility is equipped with a testing header. At the header produced fluids (oil, water, and gas) enter the production facility. (Header is seen in picture #1).

At the header produced fluids may be sent to the testing vessel or the production vessel. Only one well will be sent to the testing vessel at a given time. The other wells that flow to this battery will be sent to the production vessel. The testing vessel is a 3 phase separator (seen in picture # 2) that will meter all phases prior to it commingling with other producing wells. The oil will flow thru the oil dump and pass thru an oil meter and then to a separate oil test tank. The water will pass thru the water dump and thru a water meter and be recorded and commingled with water from other leases in the common water tank. The gas will flow out the top of the separator and then thru a gas test meter and then be commingled with gas from the other wells at the production meter. So oil will be measured using a gauge line in a separate oil test tank and also a meter, water will be measured using only a turbine meter, and gas will be tested using a total flow EFM gas orifice meter.

All wells will be tested for a period of no less than 3 days per month to achieve the most accurate test information. In this case where there are only 2 wells being tested at this battery so each well will have approximately 15 – (24 hr well test) each month. Well test information is recorded in our auditable production system by the name of eVIN. Wells will be rotated in test and then into the production separators throughout there producing lives.

Allocation of oil, water, and gas production in a testing facility is very simple. At the end of the month the battery made a given amount of oil, water, and gas and all wells that flow to that battery have been tested. The well test will be used to determine each wells contribution to the entire batteries production and from that each well will get its percent of oil, water, and gas produced.

RE: Explanation for requesting surface commingle

Duncan

Mewbourne Oil Company has requested permission to surface commingle production from our Fast Draw 4 EH Fed Com #1H well (API 30-015-38636) with our Long Draw 4 I Fed # 1 well (API # 30-015-37202) and Long Draw 4 JL Fed # 1H (API # 30-015-37585). The central battery will be located on the Long Draw 4 I Fed # 1 well site. This battery had constructed cost of \$200,000. It makes great economic sense to build the large battery to accommodate future wells. Another reason for surface commingling is the footprint of large batteries and facilities. If MOC were granted permission to surface commingle wells it would allow for pads on wells going to a common battery to reclaimed further.

Any questions on this matter I may be reached at (575) 390-4816 cell, (575) 393-5905 office, [rterrell@mewbounre.com](mailto:rterrell@mewbounre.com) email.

RE: Statement describing how surface commingle will not reduce value or royalty.

Duncan

Mewbourne Oil Company has requested permission to surface commingle production from our Fast Draw 4 EH Fed Com #1H well (API 30-015-38636) with our Long Draw 4 I Fed # 1 well (API # 30-015-37202) and Long Draw 4 JL Fed # 1H (API # 30-015-37585). The central battery will be located on the Long Draw 4 I Fed # 1 well site. This will not reduce the value of reserves or interest to any parties involved. All wells will be producing from the same source of supply so oil and gas gravities will be very similar. Wells are all producing from Cemetery Yeso Pool # 11795.

Any questions on this matter I may be reached at (575) 390-4816 cell, (575) 393-5905 office, [rterrell@mewbourne.com](mailto:rterrell@mewbourne.com) email.

Thank you,

Robin Terrell  
Mewbourne Oil Co  
Sr. Production Engineer

RE: Informed all parties statement

Duncan

Mewbourne Oil Company has requested permission to surface commingle production from our Fast Draw 4 EH Fed Com #1H well (API 30-015-38636) with our Long Draw 4 I Fed # 1 well (API # 30-015-37202) and Long Draw 4 JL Fed # 1H (API # 30-015-37585). The central battery will be located on the Long Draw 4 I Fed # 1 well site. MOC has sent certified letters just like the one Carlsbad BLM received notifying them of MOC's proposal to surface commingle these wells. I have attached the contact list and a copy of these letters.

Any questions on this matter I may be reached at (575) 390-4816 cell, (575) 393-5905 office, [rterrell@mewbounre.com](mailto:rterrell@mewbounre.com) email.

Dear Mr. Blackmar:

Mewbourne Oil Company (Mewbourne) has filed an application with the New Mexico Oil Conservation Division (Division) seeking authorization to surface commingle production from the North Seven Rivers; Glorieta-Yeso Pool originating from the Long Draw "4" I Federal No. 1, Long Draw "4" JL Federal No. 1H and the Fast Draw "4" EH Fed. Com No. 1H wells located on Federal and Fee Leases, which comprise the S/2N/2 and N/2S/2 of Section 4, T20S, R25E, Eddy County, New Mexico. All production from these wells is to be stored in the Long Draw "4" I Tank Battery, located in the NE/4SE/4 of said Section 4. Mewbourne will use well test in order to accurately determine each wells production. If you object to the application, you must notify the Division in writing no later than 20 days from the date of this letter (the Division's address is 1220 South St. Francis Drive, Santa Fe, New Mexico 87505). Failure to object will preclude you from contesting this matter later.

Should you have any questions regarding the above, please email me at [cmitchell@mewbourne.com](mailto:cmitchell@mewbourne.com) or call me at (432) 682-3715.

Sincerely,

MEWBOURNE OIL COMPANY

Ladies and Gentlemen:

Mewbourne Oil Company (Mewbourne) has filed an application with the New Mexico Oil Conservation Division (Division) seeking authorization to surface commingle production from the North Seven Rivers; Glorieta-Yeso Pool originating from the Long Draw "4" I Federal No. 1, Long Draw "4" JL Federal No. 1H and the Fast Draw "4" EH Fed. Com No. 1H wells located on Federal and Fee Leases, which comprise the S/2N/2 and N/2S/2 of Section 4, T20S, R25E, Eddy County, New Mexico. All production from these wells is to be stored in the Long Draw "4" I Tank Battery, located in the NE/4SE/4 of said Section 4. Mewbourne will use well test in order to accurately determine each wells production. If you object to the application, you must notify the Division in writing no later than 20 days from the date of this letter (the Division's address is 1220 South St. Francis Drive, Santa Fe, New Mexico 87505). Failure to object will preclude you from contesting this matter later.

Should you have any questions regarding the above, please email me at [cmitchell@mewbourne.com](mailto:cmitchell@mewbourne.com) or call me at (432) 682-3715.

Sincerely,

MEWBOURNE OIL COMPANY
