and

CANCELLATION

Administrative Order CTB-32

Gentlemen:

Reference is made to your application dated July 10, 1969, for administrative authority to commingle Blinbry, Tubb-Drinkard, Ellenburger, Montoya, and Fusselman production on your A. B. Coates "C" and "D" Leases in Section 24, Township 25 South, Range 37 East, Lea County, New Mexico. It is our understanding that all production from both leases is of common ownership; further that all production with the exception of the Ellenburger on the "C" lease and the Blinbry on the "C" lease is of marginal nature and that you therefore propose to commingle in the following manner:

System No. 1: Commingle "C" Ellenburger, Montoya, and Fusselman production after separately metering the Ellenburger production and determining total Montoya and Fusselman production by means of the subtraction method. Allocation of this total would then be to each pool and each lease on the basis of net oil computer tests.

System No. 2: Commingle "C" Blinbry and Tubb-Drinkard production and "D" Blinbry and Tubb-Drinkard production after separately metering the Blinbry production and determining the total Tubb-Drinkard production by means of the subtraction method. Allocation to each of the two leases would then be on the basis of monthly net oil computer tests.

Pursuant to the authority granted me under the provisions of Rule 303 (b) and Rule 309-B of the Commission Rules and Regulations, you are hereby authorized to commingle the production from the aforesaid pools and leases in the above-described manner. Provided however, that the installation shall be operated in accordance with the provisions of the Commission "Manual for the Installation and Operation of Commingling Facilities," including the requirement for non-reset counters on the meters, and that you shall notify the Commission in the event that any of the production which is now of marginal nature should become capable of top allowable. You are further requested to notify the Hobbs District Office of the Commission at such time as the revision of the installation is complete in order that an inspection may be made thereof.

Y

Administrative Order CTB-32 dated September 25, 1958, which authorized certain commingling on the subject leases, is hereby superseded, and Commission Orders Nos. R-1297 and R-1330-A, which also authorized certain commingling on these leases, are hereby put in abeyance.

It is the responsibility of the producer to notify the transporter of this commingling authority.

Very truly yours,

Gentlemen:

Reference is made to your application dated September 15, 1958, for administrative approval of an exception to Rule 309 (a) of the Rules and Regulations of the Oil Conservation Commission to permit the commingling of the oil produced from the Justis-Drinkard Pool in a Drinkard Battery, the oil produced from the Justis-Ellenburger Pool in an Ellenburger Battery and the oil produced from the Justis-Fusselman Pool in a Fusselman Battery on the following described oil and gas leases, to-wit:

A. B. Coates "C" Lease (Las Cruces 032650 (b)).
Township 25 South, Range 37 East, NMPM
Section 24: E/2; SE/4 NW/4; NE/4 SW/4.

A. B. Coates "D" Lease (Las Cruces 032650 (a)).
Township 25 South, Range 37 East, NMPM
Section 24: SE/4 SW/4

By the authority vested in me under the provisions of Rule 309 (b) of the Rules and Regulations of the Oil Conservation Commission of New Mexico, I hereby authorize you to commingle the production from the above-described leases as proposed.

Nothing contained herein shall be construed as authorizing the production of more than 16 wells into a single tank battery.

Very truly yours,

A. L. PORTER, Jr.,

If gas is not being sold, give reasons and also explain its present disposition:

Gas is being flared to lease burning pit. This gas is flash gas from high gravity fluid recovered from the compressor gas scrubbers. Gas flared is in small volumes.

REASON(S) FOR FILING (please check proper box)

Change in Transporter (check one)

Other (explain below)

Oil ☐ Dry Gas ☐Casing head gas . ☐ Condensate.. ☐

A gas lift system has been installed on the Coates "C" & "D" leases. Suction gas to the compressor comes from four production separators on our commingled battery. During compression stages, hydro-carbon liquids are recovered, metered and commingled with lease crude in the stock tanks.

Remarks

Only one compressor is installed in this gas lift system of present. It's capacity is approximately 1500 MCFPD. From this volume, 15 BOPD is recovered by scrubbers.

The undersigned certifies that the Rules and Regulations of the Oil Conservation Commission have been complied with.

Executed this the 15th day of November, 19 63.
