Mr. D. S. Nutter, Chief Engineer  
New Mexico Oil Conservation Commission  
State Land Office Building  
Santa Fe, New Mexico

Dear Mr. Nutter:

In accordance with our telephone conversation of this afternoon,  
enclosed is a copy of a letter received from the Commissioner of Public  
Lands of New Mexico, indicating his approval of our application to  
commingle production from the captioned leases.

Your early consideration of our application will be appreciated.

Very truly yours,

SIGNAL OIL AND GAS COMPANY

Re: Application to Commingle Production  
from State Leases E-8252 and E-8253  
Sections 29 & 30, T-8-S, R-33-E  
TOBAC (PENN.) FIELD, Chaves County,  
New Mexico

Gentlemen:

Reference is made to your letter of July 16, 1964, in which you request permission to commingle production from Sections 29 and 30, T8S, R33E, Lease Nos. E-8252 and E-8253 respectively. Ownership and royalty interests are common on both leases, so therefore this office grants you permission to commingle as requested.

This approval is granted upon the condition that the Oil and Gas Division shall be notified of any changes or alteration in the system. It is understood that the Commissioner of Public Lands reserves the right to review this decision if and when commingling appears to reduce the royalty due to the State of New Mexico. Also, we would like to have a periodic report on each lease.

Very truly yours,

E. S. JOHNNY WALKER  
Commissioner of Public Lands

Mr. A. J. Porter, Secretary- Director  
New Mexico Oil Conservation Commission  
State Land Office Building  
Santa Fe, New Mexico

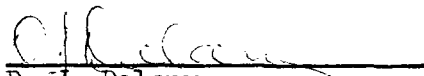

Dear Mr. Porter:

In accordance with the provisions of Rule 303 (b) of the New Mexico Oil Conservation Commission Rules and Regulations, application is hereby made for exception to Rule 309-A to grant permission for the commingling of the production from the subject leases.

The production obtained on the two leases is from a common pool, the Bough "C" Formation, and all ownership and royalty interests are common and identical to both leases. The present daily volume of liquid hydrocarbons produced is approximately 320 barrels. Attached hereto is a plat showing the location of all wells on our leases and the location of the tank battery, together with a schematic diagram of the proposed installation. Adequate testing facilities will be installed to permit the determination of the producing capacity of each well at least once per month. By copy of this letter, the New Mexico State Land Commissioner is requested to consent to this application and to notify you.

Very truly yours

SIGNAL OIL AND GAS COMPANY
