OIL CONSERVATION COMMISSION P. O. BOX 871 SANTA FE. NEW MEXICO

February 26, 1965

General American Oil Company of Texes Box 416 Loco Hills, New Maxico

Attention: Mr. R. J. Heard

Administrative Order CTB-140

Gentlemen:

Reference is made to your application dated February 24, 1965, for administrative approval of an exception to Rule 309-A of the Commission Rules and Regulations to permit the commingling of oil produced from your High Lonesome waterflood project on your Brewer LC-061638 Lease and your Bosworth LC-067610-A Lease, High Lonesome Fool, Eddy County, New Mexico, without separately measuring the production from each lease. It is our understanding that although the two leases do not have identical ownership throughout, they are covered by a royalty pooling agreement executed by all parties owning an interest in the leases. Said agreement provides the manner in which the production from the leases will be allocated. Further, the regional supervisor of the United States Geological Survey has approved the application to commingle.

Under the authority granted me pursuant to Rule 309-B, you are hereby authorized to commingle the above-described production as proposed, subject to the applicable provisions of the Commission "Manual for the Installation and Operation of Commingling Facilities."

Approval of the subject commingling installation and royalty pooling agreement also constitutes authority for transfer of allowables across lease lines within the waterflood project area.

Very truly yours,

A. L. Forter, Jr. Secretary-Director

GENERAL AMERICAN OIL COMPANY OF TEXAS

21 DISTRICT OFFICE BOX 416 LOCO HILLS, NEW MEXICO February 24, 1965

Mr. D. S. Nutter Chief Engineer New Mexico Oil Conservation Commission P. O. Box 2088 Santa Fe, New Mexico

Gentlemen:

Pursuant to Rule 309-B, General American Oil Company of Texas seeks administrative approval to commingle the production from its Bosworth lease LC-067610-A, with the production from its Brewer lease LC-061638 both leases located within the boundries of a waterflood project in the High Lonesone Pool, Eddy County, New Mexico, approved by Commission Order No. R-2443.

In support of our request we submit the following exhibits:

- (1) A plat showing both leases and the zones which they are producing from.
- (2) Schematic diagrams of the countingling facility showing that from time to time exact lease production can be obtained and that facilities are available to test each well separately at least once a month.
- (3) A copy of the Royalty Pooling Agreement.
- (4) A copy of the letter of approval from John A. Anderson, Regional Oil and Gas Supervisor for the United States Geological Survey.
- (5) A letter of approval from Continental Pipe Line Company as purchaser of the production.

Production from the Bosworth and Brewer leases are from a common source of supply both being from the High Lonesome Penrose Sand Pool.

If additional information is needed please advise.

Very truly yours,

GENERAL AMERICAN OIL COMPANY OF TEXAS

District Superintendent
