Re: Application for Exception
to Rule 309-A

New Mexico Oil Conservation Commission
P. O. Box 2088
Santa Fe, New Mexico 87501

014 116

Gentlemen:

Shell Oil Company hereby makes application for administrative approval to commingle before marketing production from the Hodges-Federal "A" (Section 27, T-8-S, R-30-E) and Hodges-Federal "B" (W/2, Section 34, T-8-S, R-30-E) Leases, Cato Field, Chaves County, New Mexico.

We propose to commingle the two leases without separately metering production from each lease as both leases are filed under State No. NM-3519 and royalty interests are common throughout. Allocation of production from each well and each lease will be based on monthly well tests.

All wells produce from the same formation with similar gravity; therefore, no change in the commercial value of the production is anticipated.

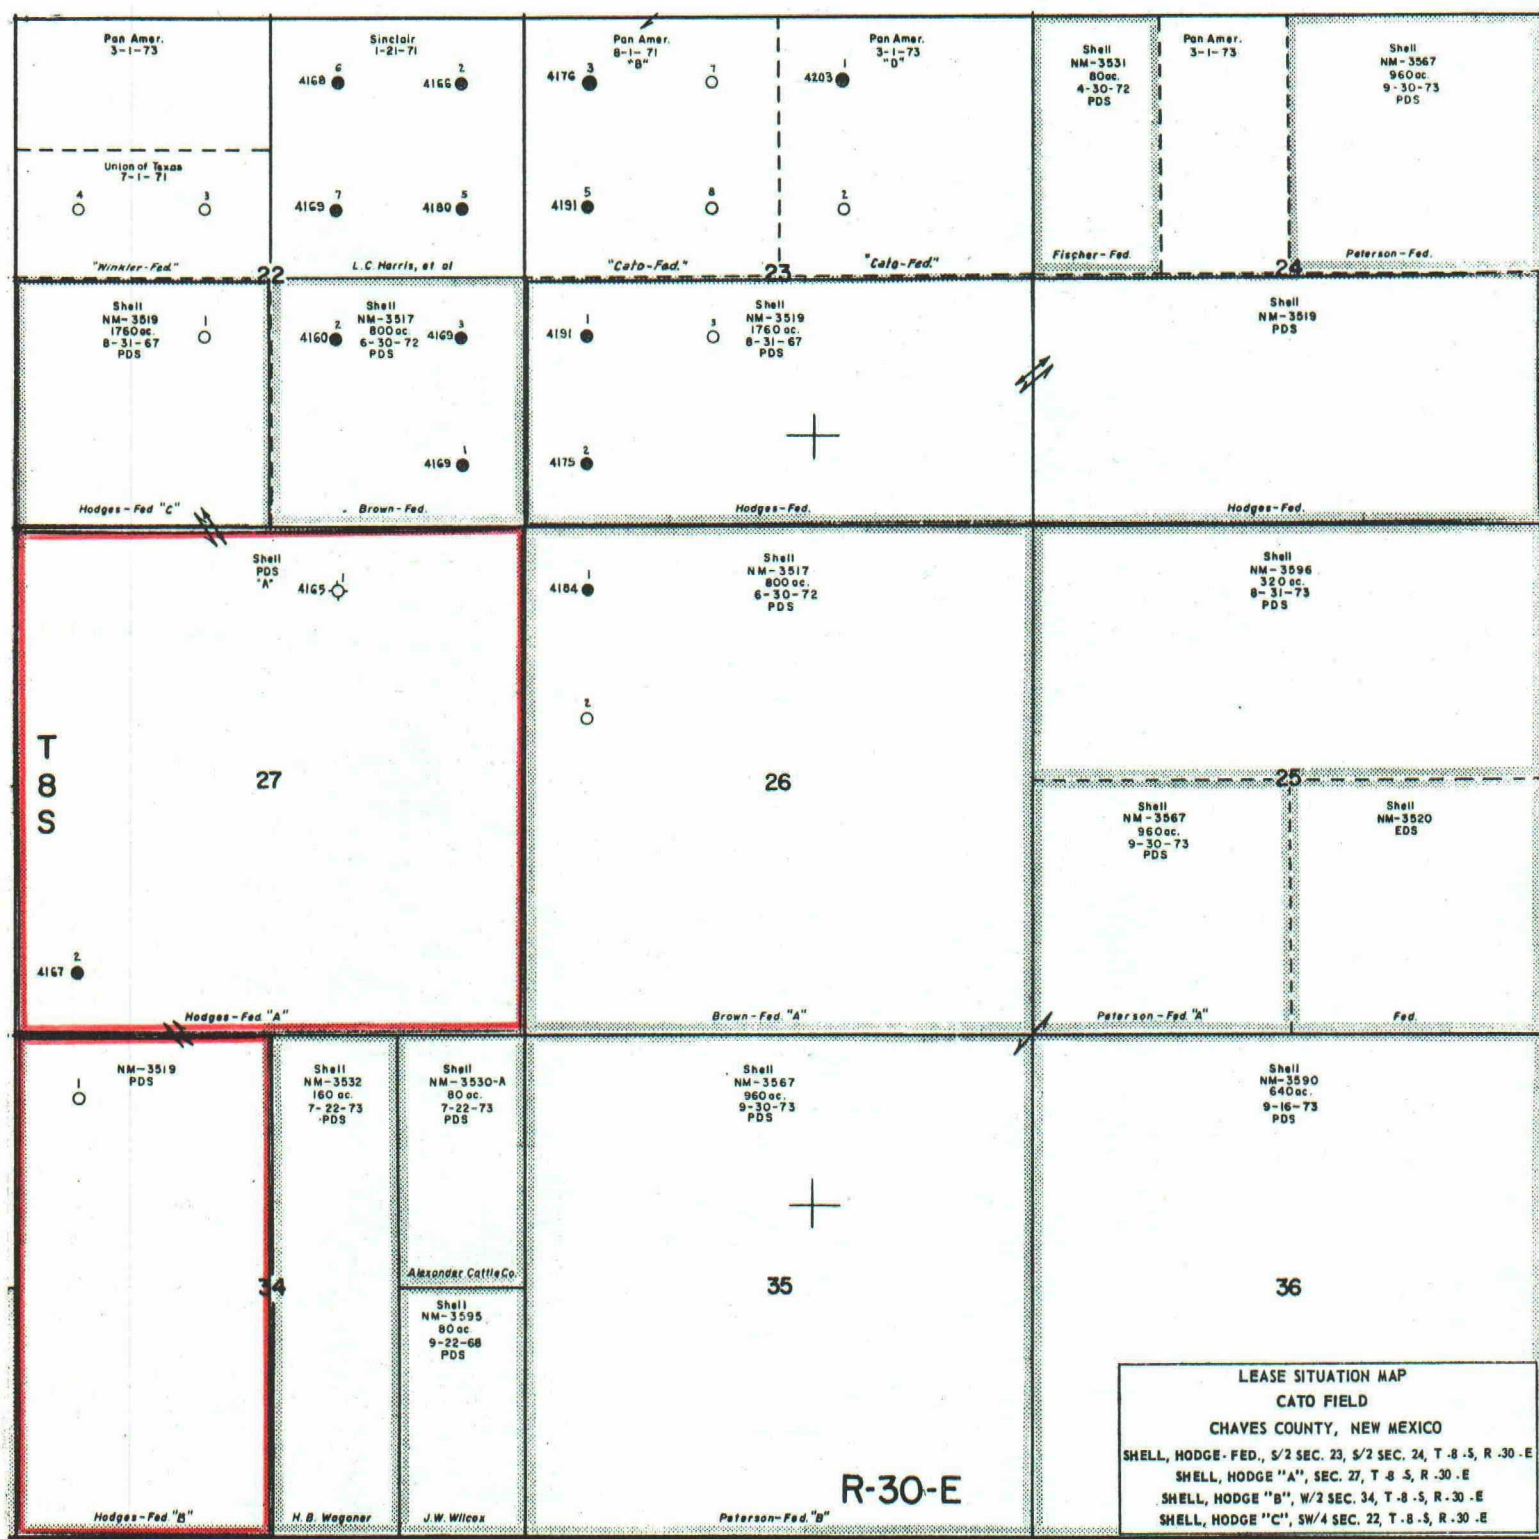

Attached for your consideration are a lease plat, schematic diagram of the proposed installation, and letters from all parties owning an interest in the leases and the purchaser of the production consenting to the proposed commingling. If additional information is required, please contact this office.

Yours very truly,

J. E. R. Sheeler
Division Production Manager

Gentlemen:

Scurlock Oil Company presently is the purchaser of production from referenced lease. This letter is intended to advise you that we have no objections to your commingling the production from these two leases into common tankage.

Please let us know if we can assist you in any way.

Very truly yours,

SCURLOCK OIL COMPANY

Attention: Mr. J. E. R. Sheeler

Gentlemen:

Your application of August 30, 1967, to the Bureau of Land Management, Santa Fe, New Mexico requesting approval to commingle production on Federal leasehold New Mexico 022636 has been referred to this office.

Your application advises that Shell has designated various portions of lease New Mexico 022636 as the Hodge-Federal, Hodge-Federal A, B, and C and you are requesting approval to commingle San Andres production from these portions of the leasehold. Although Shell has given the lease separate designations, it still remains one Federal lease and approval to commingle production from a single formation on one Federal leasehold is not required.

This office has no objection to commingling San Andres production from the portions of leasehold New Mexico 022636 Shell has designated as the Hodge-Federal and Hodge-Federal A, B, and C.

Sincerely yours,

BILLY J. SHOGER
Acting Oil and Gas Supervisor

Mr. Emmett D. White (Blanche White)
P. O. Box 146
Roswell, New Mexico 88201

Dear Mr. White:

Shell Oil Company proposes to commingle production from the subject leases into a common tank battery. All of the leases are filed under State No. N.M. 3519 and U.S.G.S. Serial No. N.M. 022636 with common royalty interests throughout. The leases have been given separate designations within Shell Oil Company for convenience in well nomenclature.

All wells produce from the same pool with similar gravities; therefore, no change in the commercial value of the production is anticipated.

In order to support Shell's application to the New Mexico Oil Conservation Commission for approval to commingle this production, we would appreciate your indicating your approval in the space provided below and returning two copies to this office.

Yours very truly,

Dear Mr. Shearer:

Enclosed for you are two copies of a letterhead memorandum (LHM) dated and captioned as above.

Very truly yours,

Shell Oil Company proposes to construct a new production well in the Permian Basin, Texas, and to operate the same. The proposed well is located in the Permian Basin, Texas, and is situated on the land owned by the Permian Basin Production Company. The proposed well is to be drilled and operated in accordance with the provisions of the Permian Basin Production Company's operating agreement. The proposed well is to be drilled and operated in accordance with the provisions of the Permian Basin Production Company's operating agreement. The proposed well is to be drilled and operated in accordance with the provisions of the Permian Basin Production Company's operating agreement.

All wells produce from the same pool with similar geology. Therefore, no change in the commercial value of the production is anticipated.

In view of the fact that the proposed well is situated on the land owned by the Permian Basin Production Company, and that the proposed well is to be drilled and operated in accordance with the provisions of the Permian Basin Production Company's operating agreement, it is recommended that the proposed well be drilled and operated in accordance with the provisions of the Permian Basin Production Company's operating agreement.

Very truly yours,
J. B. Shearer
