Re: Application to Commingle Oil and Gas Production

Dear Mr. LeMay:

I would like permission to commingle production from the following leases:

State 197	Lea A State
SE/4 SE/4	W/2
6-17S-34E	8-17S-34E
Lea Co., NM	Lea Co., NM
State Lease B-5659	State Lease E-1085

61750

The Lea State Lease has six producing wells going into a central battery. The State 197 Lease is a one well lease connected to its own battery. Simply by running one flowline this production would flow into one battery. The State 197 battery could be dismantled and the surface returned to its original state. The consolidation of this production should extend the economic life of both leases.

Ownership of the leases is common throughout. The State of New Mexico owns a 12.5% royalty, Lynx Petroleum owns a 6.5% ORRI, and Intrepid Operating Ltd. Co. owns 81.0%. Both leases share the same beneficiary, the Common Schools and both leases are operated by Ralph C. Bruton with 100% W.I. Both leases produce from the Vacuum Grayburg - San Andres formation. Attached are maps showing the present configuration as well as the proposed configuration. Also, a production flow schematic and a description of all the wells involved is included.

The commingling of these two leases would enhance the environment by removing a battery, extend the life of these leases, and ease the burden on the operator and oil purchaser by having only one loading point.

Thank you for your consideration in this matter. If further information is needed, please write or call 505-390-0366.

Best Regards,

Re: Application for Surface Commingling  
State '197' Lease (B-5659)  
SE/4SE/4, Section 6-17S-34E  
Lea 'A' State Lease (E-1085)  
W/2, Section 8-17S-34E  
Lea County, New Mexico

Dear Mr. Bruton:

We have received your letter of October 27, 1997, wherein you requested our approval for surface commingling of production from the above wells.

We understand that production from the subject wells will be commingled at the Lea 'A' State Lease tank battery located in the SE/4SE/4 of Section 6-17S-34E. Production from each of the wells will be allocated based upon historical well production.

Since it appears that there will be no loss of revenue to the State of New Mexico's beneficiaries as a result of your proposed operation, your request is hereby approved. Our approval is given with the understanding that the Commissioner of Public Lands reserves the right to amend or withdraw his approval, should this operation prove to be unprofitable to the state at any time in the future. Also, our approval is subject to like approval by the New Mexico Oil Conservation Division.

Please submit a copy of the New Mexico Oil Conservation Division's approval.

Your \$30.00 filing fee has been received.

Our approval will be contingent upon Ralph C. Bruton securing the appropriate right-of-way through the NW/4NW/4 of Section 8-17S-34E.

Please notify Ms. Debbie Padilla of our Right-of-Way Section at 827-5729 regarding a right-of-way through the NW/4NW/4 of Section 08-17S-34E.
