Attention: J. M. Winder

Dear Marcus:

With regards to the application for injection for the Northeast Drinkard Unit Well No. 322 dated April 6, 1989, I am requesting that some additional information be submitted prior to approval. As we have discussed previously, on every such application I am obligated to examine the area of review well data to ensure that these wells will not serve as a conduit for migration of water from the injection formation. From the information contained in your application, this task is very difficult to accomplish. I realize that the construction data for most of these wells has been previously submitted as evidence in Case No. 9232 and as such I do not request that it be resubmitted. I do request however, that you submit a tabular list of area of review wells since this information is difficult to obtain from the map you submitted. This list should include the well name and number and well location information. Hopefully, we will have the construction information on file for all these wells.

If you should have any questions, please contact me at (505) 827-5800.

Sincerely,

A handwritten signature in cursive script that reads "David Catanach".

David Catanach
